PAGON Espen Johnsen,2023-10-05 Through the 1940s and 1950s PAGON Progressive Architects Group Oslo Norway was an alliance of young CIAM affiliated Norwegian architects known for their innovative joint projects As a group PAGON went on to become largely overlooked in the history of modern architecture even though its individual members which included Sverre Fehn Jørn Utzon Arne Korsmo and Christian Norberg Schulz became defining figures in Scandinavian and international modernism This book tells the story of PAGON for the first time offering an impressive account of the group's projects buildings and approach and demonstrating why PAGON's projects are ripe for reappraisal in the international history of modern architecture It shows how PAGON's architecture constitutes a unique continuity between the Scandinavian functionalism of the late 1930s and the modern movement in the US and an important transitional stage before the emergence of the better known neo avant garde groups within CIAM and Team 10 Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects this book fills a gap in our understanding of mid century modern architecture and highlights the internationally diverse nature of the modern movement

## **Organic Design in Twentieth-Century Nordic**

**Architecture** Erik Champion,2019-02-18 Organic Design in Twentieth Century Nordic Architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints The book focuses on the works and writings of architects in Nordic countries such as Sigurd Lewerentz Jørn Utzon Sverre Fehn and the Aaltos Aino Elissa and Alvar among others It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between

designer architectural brief and building as process With over 140 black and white images this book is an intriguing read for architecture students and professionals alike      *Terracotta* Clare Dieckmann,2023-10-01 Contemporary rammed earth buildings present an alternative material choice for Australian architects Earth can be recycled endlessly making unaltered mixtures of earth the most sustainable option The sustainable potential of earth is raising awareness towards where our broader construction industry chooses to extract materials from and our impact on the natural environment Rammed earth buildings are often located within rural and regional settings set amongst beautiful landscapes of wine growing vineyards in nutrient rich soils Australian rammed earth walls are coloured by the unique mineral composition of soil stamped beneath our feet      *Exercises in Architecture* Simon Unwin,2022-08-01 This revised edition of Exercises in Architecture Learning to Think as an Architect is full of new content building on the success of the previous edition All the original exercises have been revised and new ones added with the format changing to allow the inclusion of more supplementary material The aim remains the same to help pre or early course architecture students begin and develop their ability to think as architects Learning to do architecture is tricky It involves awakening abilities that remain dormant in most people It is like learning language for the first time a task made more mystifying by the fact that architecture deals not in words but in places places to stand to walk to sit to hide to sleep to cook to eat to work to play to worship This book was written for those who want to be architects It suggests a basis for early experiences in a school of architecture but it could also be used in secondary schools and colleges or as self directed preparation for students in the months before entering professional education Exercises in Architecture builds on and supplements the methodology for architectural analysis presented in the author s previous book Analysing Architecture the Universal Language of Place Making fifth edition 2021 and demonstrated in his Twenty Five Buildings Every Architect Should Understand Routledge 2015 Together the three books deal with the three aspects of learning any creative discipline 1 Analysing Architecture provides a methodology for analysis that develops an understanding of the way architecture works 2 Twenty Five Buildings explores and extends that methodology through analysis of examples as case studies and 3 Exercises in Architecture offers a way of expanding understanding and developing fluency by following a range of rudimentary and more sophisticated exercises Those who wish to become professional architects wherever in the world they might be must make a conscious effort to learn the universal language of architecture as place making to explore its powers and how they might be used The exercises in this book are designed to help      **Sverre Fehn** Per Olaf Fjeld,Sverre Fehn,1983 As recipient of the 1997 Pritzker Architecture Prize the profession s highest honor Norwegian architect Sverre Fehn has had an impact not only in his home country but around the globe His projects often described as being instilled with a human quality include the Norwegian Pavilion at the 1958 Brussels World Exhibition and the Nordic Pavilion at the 1962 Venice Biennale the Hamar Bispegaard Museum in Hamar the Glacier Museum in Fjaerland Fjord and the Aukrust Museum in Alvdal Fehn has been strongly influenced by Scandinavia s breathtaking landscape and

**Materials, Form and Architecture** Richard Weston,2003 After a century largely dominated by discussions of space and form there is now renewed interest in the material aspects of architecture Backlashing against the digital and virtual wave there is a fresh emphasis on the material qualities of buildings while ironically it is the information technologies that allow the architect direct control over what happens on the building site once more The early chapters of the book survey the field historically and explore the theory of materials and form These are followed by seven thematic chapters and a well illustrated discussion of the future of materials with examples chosen from contemporary architecture The book aims to excite students and architects to take more interest in this often neglected aspect of architecture It counters the tendency to think of materials as a technical issue by addressing the subject historically and critically linking cultural ideas to technical means
