On April 20, 2010 a well control event allowed hydrocarbons to escape from the Macondo well onto Transocean's Deepwater Horizon resulting in explosions and fire on the rig. This is the report of an internal BP incident investigation team. It presents an analysis of the events leading up to the accident, 8 key findings related to the causal chain of events and recommendations to enable the prevention of a similar accident. The investigation team worked separately from any investigation conducted by other companies involved in the accident and it did not review its analyses, conclusions or recommendations with any other company or investigation team. Other investigations such as the U.S. Coast Guard, U.S. Justice Dept. and Bur. of Ocean Energy Mgmt. and the Pres. Nat. Comm. are ongoing.
