*Infrastructure and Technology Management* Tugrul U. Daim, Leong Chan, Judith Estep, 2018-01-10 This book presents emerging technology

management approaches and applied cases from leading infrastructure sectors such as energy healthcare transportation and education. Featuring timely topics such as fracking technology electric cars Google's eco friendly mobile technology and Amazon Prime Air the volume's contributions explore the current management challenges that have resulted from the development of new technologies and present tools applications and frameworks that can be utilized to overcome these challenges. Emerging technologies make us rethink how our infrastructure will look in the future. Solar and wind generation for example have already changed the dynamics of the power sector. While they have helped to reduce the use of fossil fuels they have created management complications due to their intermittent natures. Meanwhile information technologies have changed how we manage healthcare making it safer and more accessible but not without implications for cost and administration. Autonomous cars are around the corner. On line education is no longer a myth but still a largely unfulfilled opportunity. Digitization of car ownership is achievable thanks to emerging business models leveraging new communication technologies. The major challenge is how to evaluate the relative costs and benefits of these technologies. This book offers insights from both researchers and industry practitioners to address this challenge and anticipate the impact of new technologies on infrastructure now and in the future.

*Dynamic Assessment of Students' Academic Writing* Prithvi N. Shrestha, 2020-09-11 This book explores the application of an innovative assessment approach known as Dynamic Assessment (DA) to academic writing assessment as developed within the Vygotskian sociocultural theory of learning. DA blends instruction with assessment by targeting and further developing students' Zone of Proximal Development (ZPD). The book presents the application of DA to assessing academic writing by developing a set of DA procedures for academic writing teachers. It further demonstrates the application of Hallidayan Systemic Functional Linguistics (SFL) combined with DA to track undergraduate business management students' academic writing and conceptual development in distance education. This work extends previous DA studies in three key ways: i) it explicitly focuses on the construction of a macrogenre whole text as opposed to investigations of decontextualized language fragments; ii) it offers the first in-depth application of the powerful SFL tool to analyse students' academic writing to track their academic writing trajectory in DA research; and iii) it identifies a range of mediational strategies and consequently expands Poehner's 2005 framework of mediation typologies. Dynamic Assessment of Students' Academic Writing will be of great value to academic writing researchers and teachers' language
