AI in the earlier conferences Tokyo 1986 Atlanta 1988 Melbourne 1991 and Hong Kong 1992 the response to the call for
presentations at ICES 95 in Hawaii has been overwhelming A very careful screening of the extended abstracts resulted in
about 500 paper being accepted for presentation Out of these written versions of about 480 papers reached the conference
secretariat in Atlanta in time for inclusion in these proceedings The topics covered at ICES 95 range over the broadest
spectrum of computational engineering science The editors thank the international scientific committee for their advice and
encouragement in making ICES 95 a successful scientific event Special thanks are expressed to the International Association
for Boundary Elements Methods for hosting IABEM 95 in conjunction with ICES 95 The editors here express their deepest
gratitude to Ms Stacy Morgan for her careful handling of a myriad of details of ICES 95 often times under severe time
constraints The editors hope that the readers of this proceedings will find a kaleidoscopic view of computational engineering

Lindgren, Mikael Jonsson, 2013-03-08 The International Union of Theoretical and Applied Mechanics IUTAM initiated and
sponsored an International Symposium on The Mechanical Effects of Welding was held in Lulea Sweden 10 14 June 1991 The
intention of the The Symposium Symposium was to gather active scientists in order to assess the current state of the art and
future directions The field of welding is an area which includes a large number of scientific disciplines such as materials
science solid mechanics thermal science and also mechanical engineering design and production engineering The intention
of the Symposium was to cover the direct mechanical effects of welding and their influence on the in service behaviour of

welded structures The Mechanical Effects of Welding is a very appropriate theme for an IUTAM Symposium Progress in this field requires close interaction between researchers in several disciplines This is reflected in the topics covered The topics of the different sessions were o Calculations of Temperatures Strains and Stresses o Residual Stresses and Residual Deformations o Measurements of Residual Strains and Stresses o Effects of Defects and Residual Stresses on Fracture and Fatigue o Effects of Residual Stresses on Creep Deformation o Effects of Residual Deformations and Residual Stresses on Buckling There were 50 participants from 12 countries at the Symposium The 28 papers presented at the Symposium are collected in this volume A Scientific Committee appointed by the Bureau of IUTAM selected the participants to be invited and the papers to be presented
