### Reproductive:

menstrual cycle and the occurrence of ovulation. During the proliferative phase, increasing levels of estrogen contribute to endometrial repair and proliferation. After ovulation, endometrial thickness (luteal phase). Once ovulation occurs and serum progesterone levels increase, the endometrial tissue develops secretory characteristics (secretory phase). If implantation of a fertilized ovum does not take place, endometrial tissue begins to break down and slough off. In days after ovulation, menses phase of menstruation begins. Sloughing of tissue (menstrual bleeding) begins about 14 days after ovulation.

## **Week 8 Final Exam Final Exam:**

*Focus Workbook* Barbara Robinson, 1998-07-13 Focus builds an overall framework for understanding the organization of the English language and helps students recognize the inseparable relationship between form meaning and use. The Workbook is designed primarily to supplement the Student's Book but can be used as a useful source of information and practice on its own. The exercises are intended for individual work outside of class or for use as part of class discussions and activities. Each chapter which corresponds to a chapter in the textbook includes focused exercises that allow students to concentrate on one particular structure. Integrative exercises where structures from previous sections or chapters are spiraled in with new structures practice with prepositions and editing exercises.
