Symbolic Data Analysis Conceptual Statistics And Data Mining:

Symbolic Data Analysis Lynne Billard,Edwin Diday,2006 The first book to present a unified account of symbolic data analysis methods in a consistent statistical framework Symbolic Data Analysis features a substantial number of examples from a range of application areas including health the social sciences economics and computer science Handbook of Research on Innovations in Database Technologies and Applications: Current and Future Trends Ferraggine, Viviana E.,Doorn, Jorge Horacio,Rivero, Laura C.,2009-02-28 This book provides a wide compendium of references to topics in the field of the databases systems and applications Provided by publisher **Handbook of Cluster Analysis** Christian Hennig,Marina Meila,Fionn Murtagh,Roberto Rocci,2015-12-16 Handbook of Cluster Analysis provides a comprehensive and unified account of the main research developments in cluster analysis Written by active distinguished researchers in this area the book helps readers make informed choices of the most suitable clustering approach for their problem and make better use of existing cluster analysis tools The **Data Science, Classification, and Artificial Intelligence for Modeling Decision Making** Javier Trejos,Theodore Chadjipadelis,Aurea Grané,Mario Villalobos,2025-04-19 This book gathers selected and peer reviewed contributions presented at the 18th Conference of the International Federation of Classification Societies IFCS 2024 held in San Jos Costa Rica July 15 19 2024 Covering a wide range of topics it describes modern methods and real world applications in data science classification and artificial intelligence related to modeling decision making Numerous novel techniques and innovative applications are investigated such as anomaly detection in public procurement processes multivariate functional data clustering air pollution prediction benchmark generation for probabilistic planning recommendation systems based on symbolic data analysis and methods for clustering mixed type data Advanced statistical concepts are explored including Vapnik Chervonenkis dimensionality Riemannian statistics hypothesis testing for interval valued data and mixed models Furthermore machine learning techniques are applied to predict soil bacterial and fungal communities classify electoral behavior and political competition and assess corrosion degradation in mining pipelines The diversity of topics discussed in this collection reflects the ongoing advancement and interdisciplinary nature of statistical and data science research as well as its application across various fields and sectors These studies contribute to the development of robust methodologies and efficient computational tools to address complex challenges in the era of big data The book is intended for researchers and practitioners seeking the latest developments and applications in the field of data science and classification **Progress in Artificial Intelligence and Pattern Recognition** Yanio Hernández Heredia,Vladimir Milián Núñez,José Ruiz Shulcloper,2018-09-21 This book constitutes the refereed proceedings of the 6th International Workshop on Artificial Intelligence and Pattern Recognition IWAIPR 2018 held in Havana Cuba in September 2018 The 42 full papers presented were carefully reviewed and selected from 101 submissions The papers promote and disseminate ongoing research on mathematical methods and computing techniques for artificial intelligence and pattern

recognition in particular in bioinformatics cognitive and humanoid vision computer vision image analysis and intelligent data analysis as well as their application in a number of diverse areas such as industry health robotics data mining opinion mining and sentiment analysis telecommunications document analysis and natural language processing and recognition **Deep Learning Models for Economic Research** Andrzej Dudek,2025-10-21 In today s data driven world the ability to make sense of complex high dimensional datasets is crucial for economists and data scientists Traditional quantitative methods while powerful often struggle to keep up with the complexities of modern economic challenges This book bridges this gap integrating cutting edge machine learning techniques with established economic analysis to provide new more accurate insights The book offers a comprehensive approach to understanding and applying neural networks and deep learning models in the context of conducting economic research It starts by laying the groundwork with essential quantitative methods such as cluster analysis regression and factor analysis then demonstrates how these can be enhanced with deep learning techniques like recurrent neural networks RNNs convolutional neural networks CNNs and transformers By guiding readers through real world examples complete with Python code and access to datasets it showcases the practical benefits of neural networks in solving complex economic problems such as fraud detection sentiment analysis stock price forecasting and inflation factor analysis Importantly the book also addresses critical concerns about the black box nature of deep learning offering interpretability techniques like Local Interpretable Model agnostic Explanations LIME and SHapley Additive exPlanations SHAP to demystify model predictions The book is essential reading for economists data scientists and professionals looking to deepen their understanding of AI s role in economic modeling It is also an accessible resource for non experts interested in how machine learning is transforming economic analysis **Artificial Neural Networks and Machine Learning -- ICANN 2012** Alessandro Villa,Włodzisław Duch,Péter Érdi,Francesco Masulli,Günther Palm,2012-09-19 The two volume set LNCS 7552 7553 constitutes the proceedings of the 22nd International Conference on Artificial Neural Networks ICANN 2012 held in Lausanne Switzerland in September 2012 The 162 papers included in the proceedings were carefully reviewed and selected from 247 submissions They are organized in topical sections named theoretical neural computation information and optimization from neurons to neuromorphism spiking dynamics from single neurons to networks complex firing patterns movement and motion from sensation to perception object and face recognition reinforcement learning bayesian and echo state networks recurrent neural networks and reservoir computing coding architectures interacting with the brain swarm intelligence and decision making mulitlayer perceptrons and kernel networks training and learning inference and recognition support vector machines self organizing maps and clustering clustering mining and exploratory analysis bioinformatics and time weries and forecasting *Advances in Artificial Intelligence and Data Engineering* Niranjan N. Chiplunkar,Takanori Fukao,2020-08-13 This book presents selected peer reviewed papers from the International Conference on Artificial Intelligence and Data Engineering AIDE 2019 The topics covered are broadly

divided into four groups artificial intelligence machine vision and robotics ambient intelligence and data engineering The book discusses recent technological advances in the emerging fields of artificial intelligence machine learning robotics virtual reality augmented reality bioinformatics intelligent systems cognitive systems computational intelligence neural networks evolutionary computation speech processing Internet of Things big data challenges data mining information retrieval and natural language processing Given its scope this book can be useful for students researchers and professionals interested in the growing applications of artificial intelligence and data engineering **Financial Risk Management and Modeling** Constantin Zopounidis,Ramzi Benkraiem,Iordanis Kalaitzoglou,2021-09-13 Risk is the main source of uncertainty for investors debtholders corporate managers and other stakeholders For all these actors it is vital to focus on identifying and managing risk before making decisions The success of their businesses depends on the relevance of their decisions and consequently on their ability to manage and deal with the different types of risk Accordingly the main objective of this book is to promote scientific research in the different areas of risk management aiming at being transversal and dealing with different aspects of risk management related to corporate finance as well as market finance Thus this book should provide useful insights for academics as well as professionals to better understand and assess the different types of risk
