This IBM Redbooks publication is designed to give the reader a broad understanding of IBM Virtual Machine Recovery Manager VMRM. VMRM is a family of solutions that provides high availability and disaster recovery HADR management solutions for users of IBM Power servers. The VMRM solutions include the following items: VMRM HA provides a single site high availability HA solution; VMRM DR provides a dual site disaster recovery DR solution; VMRM HADR and VMRM HADR HA combine HADR into a single management solution. Because VMRM is based on virtual machine VM recovery, it is operating system independent and can provide a solution for any VM running an operating system that is supported by IBM Power. The publication provides a high level description of the VMRM solutions that are suitable for management looking for availability solutions for their infrastructure. In addition, it provides in depth information into the installation, configuration and management of the solutions which is designed to help the system administrators that are involved in the installation and management of the solution.
