Synaptic Self How Our Brains Become Who We Are:

Synaptic Self Joseph LeDoux, 2003-01-28 In 1996 Joseph LeDoux's *The Emotional Brain* presented a revelatory examination of the biological bases of our emotions and memories. Now the world renowned expert on the brain has produced with a groundbreaking work that tells a more profound story how the little spaces between the neurons the brain's synapses are the channels through which we think act imagine feel and remember. Synapses encode the essence of personality enabling each of us to function as a distinctive integrated individual from moment to moment. Exploring the functioning of memory the synaptic basis of mental illness and drug addiction and the mechanism of self awareness *Synaptic Self* is a provocative and mind expanding work that is destined to become a classic. *Synaptic Self* Joseph E. LeDoux, 2002 Joseph LeDoux believes that the synapses the little spaces between the neurons in our brains are the key to everything the brain does. They are the channels of communication by which we think act imagine feel and remember. But synapses do more. They also allow interactions between mental processes allowing us to remember the important stuff in life better than the trivial. What's more synapses encode the essence of the individual allowing us to be the same person from moment to moment week to week and year to year. In short the self is synaptic.

Synaptic Self Joseph LeDoux, 2003-01-28 Following up his 1996 *The Emotional Brain* the world renowned brain expert presents a groundbreaking work that tells a more profound story how the little spaces between the neurons the brain's synapses are the channels through which we think feel imagine act and remember.

The Fiction of Our Lives Sandra M. Levy-Achteemeier, 2016-11-10 We are the author of our own lives. We create re create and co create our stories over the lifetime we have been given in order to make something of ourselves in the process. Blending new findings from brain science and psychology with spiritual and theological insights Sandra Levy Achtemeier has written a readable work translating complex scientific and spiritual categories into practical terms that can inform our everyday selves. From our evolutionary roots that equip us to sing meaning into our living to the cultural menus we now draw from to script new meaning into our days she has given us an incredible wealth of wisdom to inform the rest of our life journeys. Underneath it all Levy Achtemeier makes the case that God's Spirit and call are at the center of our story from our

brain synapses to the historical circumstances that impinge on our lives **Neuromatic** John Lardas Modern,2021-09-29

The story Modern tells ranges from eighteenth century brain anatomies to the MRI from the spread of phrenological cabinets and mental pieties in the nineteenth century to the discovery of the motor cortex and the emergence of the brain wave as a measurable manifestation of cognition from cybernetic research into neural networks and artificial intelligence to the founding of brain centric religious organizations such as Scientology from the deployments of cognitive paradigms in electric shock treatment to the work of Barbara Brown a neurofeedback pioneer who promoted the practice of controlling one's own brainwaves in the 1970s What Modern reveals via this grand tour is that our ostensibly secular turn to the brain is bound up at every turn with the religion it discounts ignores or actively dismisses Nowhere are science and religion closer than when they try to exclude each other at their own peril **Dead Sea Media** Shem Miller,2019-09-16 In Dead Sea Media Shem Miller offers a groundbreaking media criticism of the Dead Sea Scrolls Although past studies have underappreciated the crucial roles of orality and memory in the social setting of the Dead Sea Scrolls Miller convincingly demonstrates that oral performance oral tradition and oral transmission were vital components of everyday life in the communities associated with the Scrolls In addition to being literary documents the Dead Sea Scrolls were also records of both scribal and cultural memories as well as oral traditions and oral performance An examination of the Scrolls textuality reveals the oral and mnemonic background of several scribal practices and literary characteristics reflected in the Scrolls [Psychoanalysis and Psychiatry](#) Cláudio Laks Eizirik,Giovanni Foresti,2018-12-17 Psychoanalysis and Psychiatry Partners and Competitors in the Mental Health Field offers a comprehensive overview of the many links between the two fields There have long been connections between the two professions but this is the first time the many points of contact have been set out clearly for practitioners from both fields Covering social and cultural factors clinical practice including diagnosis and treatment and looking at teaching and continuing professional development this book features contributions and exchange of ideas from an international group of clinicians from across both professions Psychoanalysis and Psychiatry Partners and Competitors in the Mental Health Field will appeal to all practicing psychoanalysts and psychiatrists and anyone wanting to draw on the best of both fields in their theoretical understanding and clinical practice *The Memory Process* Suzanne Nalbantian,Paul M. Matthews,James L. McClelland,2011 The Memory Process offers a groundbreaking interdisciplinary approach to the understanding of human memory with contributions from both neuroscientists and humanists The first book to link the neuroscientific study of memory to the investigation of memory in the humanities it connects the latest findings in memory research with insights from philosophy literature theater art music and film Chapters from the scientific perspective discuss both fundamental concepts and ongoing debates from genetic and epigenetic approaches functional neuroimaging connectionist modeling dream analysis and neurocognitive studies The humanist analyses offer insights about memory from outside the laboratory a taxonomy of memory gleaned from modernist authors including Virginia Woolf James Joyce and

William Faulkner the organization of memory seen in drama ranging from Hamlet to The Glass Menagerie procedural memory and emotional memory in responses to visual art music's dependence on the listener's recall and the vivid renderings of memory and forgetting in such films as Memento and Eternal Sunshine of the Spotless Mind The chapters from the philosophical perspective serve as the bridge between science and the arts The volume's sweeping introduction offers an integrative merging of neuroscientific and humanistic findings
