Considering Bank Closure Options Mr. Michael Andrews, Mr. Mats Josefsson, 2003-01-01 Closures have been used to resolve problem banks in many countries in a wide range of economic circumstances yet banking supervisors frequently defer intervention and closure Avoiding the costs of disruption is the principal argument in favor of extraordinary measures such as the use of public funds for recapitalization or forbearance as alternatives to closing insolvent banks Well planned and implemented closure options can preserve essential functions performed by failing banks mitigating disruption Extraordinary measures to avoid closure should generally be avoided but may be used in a systemic crisis to preserve some portion of a widely insolvent banking sector **The Financial Services Sourcebook** Robert Cunnew, Alison Scammell, 2017-09-29 Provides a first port of call for those seeking information sources in a sector that has undergone tremendous change in recent years Includes information on

Market-Based Policy Instruments for Systemic Bank Restructuring Mr.Tamim Bayoumi,Mr.Paul R. Masson,1998-08-01

Since the early 1980s well over 100 countries have experienced systemic bank insolvencies An important innovation among the resulting policies for reestablishing bank soundness has been the reliance on market based instruments and policies in contrast to the largely non market oriented approach taken in the 1930s during the last big wave of banking crises This paper surveys and assesses market based policy instruments employed to overcome systemic bank problems Considerations regarding the design and mix of instruments as well as cost sharing arrangements are shown to be key aspects of effective bank restructuring Selected country examples are used to illustrate best practices
