**Azure for Developers** Kamil Mrzygłód, 2025-07-30 Advance your development career by mastering Microsoft Azure's latest tools and technologies to enhance existing applications and build powerful cloud native solutions. Key Features: Build and deploy Azure apps with web serverless and container-based architectures. Create end-to-end cloud solutions on Azure by integrating AI services, monitoring tools, and DevOps. Upskill confidently with practical insights and real-world development practices. Purchase of the print or Kindle book includes a free PDF eBook. Book Description: Supercharge your development career by mastering Azure's evolving GenAI container and serverless capabilities to build scalable, secure applications with confidence. This third edition of Azure for Developers transforms complex cloud concepts into practical skills, guiding you through the design, deployment, and management of cloud native solutions while eliminating infrastructure headaches. Fully updated with Azure's latest features, this hands-on guide helps you automate DevOps pipelines with GitHub Actions, deploy microservices using containers, and integrate generative AI via Azure OpenAI to modernize your development workflows. You will learn how to set up your environment, streamline app deployment, and implement robust service integrations using real-world best practices. The final section is a game changer for developers who want to stay ahead of the curve. It shows you how to leverage Azure's AI and machine learning services to automate tasks, fine-tune models, and build intelligent assistants and next-generation workflows. By the end, you will have the confidence and capabilities to deliver production-grade cloud solutions that meet real-world demands and position yourself at the forefront of modern cloud development. What you will learn: Integrate data solutions like Azure Storage and managed SQL databases into your applications. Embed monitoring into your application using Application Insights SDK. Develop serverless solutions with Azure Functions and Durable Functions. Automate CI/CD workflows with GitHub Actions and Azure Integration. Build and manage containers using Azure Container Apps, Azure Container Registry (ACR), and App Service. Design powerful workflows with both low-code and full-code approaches. Enhance applications with AI and machine learning components. Who this book is for: This book is for developers, data scientists, and IT professionals who want to learn how to use Microsoft Azure to build powerful, cloud-native solutions. It is also suitable for students and anyone who wants to learn about the latest trends in cloud computing.

This book is for cloud developers and engineers building applications with Microsoft Azure as well as those looking to begin a career in Azure development. While a basic understanding of programming concepts is recommended, the book covers both basic and advanced ideas and solutions, making it valuable for beginners and experienced developers looking to enhance their skills.

**Reimagine Pricing** Jan Y. Yang, 2025-06-11 This book highlights the transformative potential of AI enabled pricing, showing how it empowers businesses to unlock revenue, optimize customer experiences, and gain a competitive edge. By combining cutting edge AI technologies with actionable strategies, it offers a comprehensive roadmap for organizations looking to move from reactive manual pricing processes to proactive data driven systems that predict, adapt, and create value in real time. Focused on practical applications, the book bridges the gap between technological innovation and real world implementation. It features a unique blend of strategic insights, technical examples including Python code and AI workflows, and case studies from industries such as retail, travel, and manufacturing. These examples demonstrate how companies have increased margins, reduced churn, and driven customer loyalty by leveraging AI. It also explores fast evolving trends like autonomous systems, blockchain transparency, and ecosystem driven pricing, making it essential reading for professionals eager to future proof their pricing strategies. A key contribution of the book is its focus on the human element of AI adoption. It addresses challenges like resistance to change, ethical considerations in pricing, fairness, and building trust with both internal teams and customers. By reframing AI as an enabler rather than a replacement, the book equips pricing professionals to transition from tactical roles to strategic leadership, fostering collaboration between human intuition and machine intelligence. The book raises provocative questions: How can businesses harness AI without compromising ethics or transparency? What skills will pricing teams need to thrive in an AI driven future? And how can organizations align AI pricing with broader strategic goals? It answers these questions by offering clear actionable solutions and a vision for integrating AI into the heart of business operations, transforming pricing from a functional necessity into a strategic differentiator. Designed for business leaders, pricing experts, and AI enthusiasts, this book is not just a guide; it's a call to action to embrace the future of AI enabled pricing with confidence, creativity, and purpose.

**Data Science Solutions on Azure** Julian Soh, Priyanshi Singh, 2024-11-18 This revamped and updated book focuses on the latest in AI technology: Generative AI. It builds on the first edition by moving away from traditional data science into the area of applied AI using the latest breakthroughs in Generative AI. Based on real world projects, this edition takes a deep look into new concepts and approaches such as Prompt Engineering, testing, and grounding of Large Language Models, fine tuning, and implementing new solution architectures such as Retrieval Augmented Generation (RAG). You will learn about new embedded AI technologies in Search such as Semantic and Vector Search. Written with a view on how to implement Generative AI in software, this book contains examples and sample code. In addition to traditional Data Science experimentation in Azure Machine Learning (AML) that was covered in the first edition, the authors cover new tools such as Azure AI Studio specifically for testing and experimentation with Generative AI models. **sustainable change** Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover      **The Modern Woodman** ,1922      **Industry Week** ,1920
