

Topographic Maps Study Guide

LEARNING TARGETS:

- I understand the purpose of a topographic map and what the lines on it represent.
- I can use a topographic map to figure out the shape of land and identify features
- Given two labeled contour lines, I can figure out the contour interval of a topographic map.

VOCAB

Topographic Map	Steep	Hilltop
Elevation	Flat	Valley
Contour Interval	Cliff	Ridge
Contour Line	River	

** Remember that the closer the contour lines are to each other, the more steep the land is and the further away the lines are, the less steep the land is.*

** To figure out the contour interval of a map, find the difference in elevation between two labeled contour lines. Then, divide the difference by the number of lines between the two elevations.*
