Gagliano, 2023-11-30 This playful and practical handbook presents one of the first clinically tested treatment protocols for Functional Abdominal Pain (FAP) in young children. Created and tested by Dr. Nancy Zucker with support from the National Institutes of Health, this intervention teaches children to become FBI agents: Feeling and Body Investigators, detectives who investigate and learn to manage their symptoms. Kids develop a newfound trust in their bodies by using strategies that transform fear and confusion into curiosity and humor. This clinical manual provides a detailed step by step guide to treatment including session plans, worksheets, and activities, and is supplemented by diagrams, excerpts from case dialogues, references, and cartoons. Downloadable full color materials are available online to print and use in individual or group sessions. Offering an effective and fun approach firmly rooted in science, this manual guides clinicians in implementing FBI in their own practices, enabling more children to access this novel treatment.

Reading and All that Jazz Peter Mather, Rita McCarthy, 2003 This book analyses the primary relevant rules of international law applicable to extra territorial use of force by states against non state actors. Force in this context takes many forms ranging from targeted killings and abductions of individuals to large scale military operations amounting to armed conflict. Actions of this type have occurred in what has become known as the war on terror but are not limited to this context. Three frameworks of international law are examined in detail: These are the United Nations Charter and framework of international law regulating the resort to force in the territory of other states, the law of armed conflict often referred to as international humanitarian law, and the law enforcement framework found in international human rights law. The book examines the applicability of these frameworks to extra territorial forcible measures against non state actors and analyses the difficulties and challenges presented by application of the rules to these measures. The issues covered include among others the possibility of self defence against non state actors including anticipatory self defence, the lawfulness of measures which do not conform to the parameters of self defence, the classification of extra territorial force against non state actors as armed conflict, the war on terror as an armed conflict, the laws of armed conflict regulating force against groups and individuals, the extra territorial applicability of international human rights law, and the regulation of forcible measures under human rights law. Many of these issues are the subject of ongoing and longstanding debate. The focus in this work is on the particular challenges raised by extra territorial force against non state actors, and the book offers a number of solutions to these challenges.
