Critical Theory and Disability Teodor Mladenov, 2016-06-30 *Critical Theory and Disability* explores social and ontological issues encountered by present day disabled people applying ideas from disability studies and phenomenology It focuses on disabling contexts in order to highlight and criticize the ontological assumptions of contemporary society particularly those related to the meaning of human being In empirical terms the book explores

critically social practices that undermine disabled people's well-being drawing on cases from contemporary Bulgaria. It includes in-depth examination of key mechanisms such as disability assessment, personal assistance, direct payments, and disability-based discrimination. On this basis, wider sociological and ontological claims are made concerning the body, identity, otherness, and exclusion.

Disability Politics and Theory A.J. Withers, 2020-06-19T00:00:00Z. An accessible introduction to disability studies. *Disability Politics and Theory* provides a concise survey of disability history, exploring the concept of disability as it has been conceived from the late 19th century to the present. Further, A.J. Withers examines when, how, and why new categories of disability are created and describes how capitalism benefits from and enforces disabled people's oppression. Critiquing the model that currently dominates the discipline, the social model of disability, this book offers an alternative, the radical disability model. This model builds on the social model but draws from more recent schools of radical thought, particularly feminism and critical race theory, to emphasize the role of intersecting oppressions in the marginalization of disabled people and the importance of addressing disability both independently and in conjunction with other oppressions. Intertwining theoretical and historical analysis with personal experience, this book is a poignant portrayal of disabled people in Canada and the U.S. and a radical call for social and economic justice.

Social Theory and Practice, 2001. *Disability Studies* Dan Goodley, 2012-08-14. This introduction to disability studies represents a clear, engaging, and consistently thought-provoking study of the field. The book discusses the global nature of disability studies and disability politics, introduces key debates in the field, and represents the intersections of disability studies with feminist, class, queer, and postcolonial analyses. The book has a clear and coherent format which matches the interdisciplinary framework of disability studies, including chapters on sociology, critical psychology, discourse analysis, psychoanalysis, and education. Sitting alongside discussions on the global and local significance of disability studies, these chapters include: Society, Sociological disability studies, Individuals, De-psychologising disability studies, Psychology, Critical psychological disability studies, Culture, Psychoanalytic disability studies, Education, Inclusive disability studies. Each chapter engages with important areas of analysis such as the individual, society, community, and education to explore the realities of oppression experienced by disabled people and to develop the possibilities for addressing it. Broad, dynamic, and interdisciplinary in scope, this book will be crucial reading for students, researchers, and practitioners alike.

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008. *Disability and the Politics of Education: An International Reader* is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education. For nearly two decades, global attention has been given to education as a human right through global initiatives such as Education for All (EFA) and the Salamanca Statement. Yet, according to UNESCO, reaching the goals of EFA remains one of the most daunting challenges facing the global community. Today, millions of the world's disabled children cannot obtain a basic childhood education, particularly in countries with limited resources. Even in the wealthiest countries, many disabled children and youth are educationally

segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldisation of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches

Thompson,Linda Worrall,2008 As a consequence of the disability movement the thinking generated by the World Health Organization s classification of disability and functioning and an upturn in concern for the long term consequences of aphasia it has become apparent that two distinctive pathways for the treatment of aphasia have emerged over the past decade The first and most traditional involves assessment and management directed toward lessening the effects of the impairment of aphasia while the second pathway focuses less on specific language than on the psychosocial consequences of aphasia This unique text specifically contrasts impairment and consequences focused treatment with the aim of providing clinicians with a level playing field that permits them to evaluate for themselves the relative contributions that each approach provides to evaluate their relative strengths and weaknesses and finally to seek common ground An opening chapter sets the scene while the heart of the book based on real cases concerns five meticulously described yet hypothetical individuals with aphasia In each of the cases detailed descriptions and assessment results are provided and clinical management plans representing each approach are presented internationally by recognized expert clinicians *Proceedings* ,1997 **Wheeling and Dealing** Esther I.
