The Rise of the Sharing Economy Kevin Govender, 2021-09-27 Is access the alternative to ownership In 2011 the sharing economy was dubbed by Time magazine as one of the Ten ideas that will change the world and it has been widely hailed as a major growth sector by sources ranging from Fortune magazine to the World Economic Forum to former President Obama

The sharing economy is a new economic model that focuses on access to assets or resources instead of ownership. It has exploded in popularity over recent years and has disrupted a significant number of mature industries such as accommodation, automotive and entertainment. The total value of the global sharing economy is estimated to grow from 14 billion in 2014 to 335 billion by 2025. With limited resources, the desire to become more environmentally conscious, the high cost and burdens of ownership, and a rapidly growing population living increasingly in densely populated cities, consumers are faced with greater challenges and opportunities to fill their consumption needs. People are experiencing a significant value shift with a desire to reconnect with products and services in a more meaningful way, are becoming more cost and environmentally conscious, and are prioritising experience over ownership. An organisation's ability to reimagine and reinvent its business model to offer unique opportunities for humanising technology and developing innovative sharing platforms such as Uber and Airbnb would be a game changer for them. While the Fourth Industrial Revolution and COVID-19 pandemic are influencing and changing consumer behaviour, organisations are facing a dilemma that is affecting the future of their profitability, existence and sustainability. In *The Rise of the Sharing Economy*, Kevin Govender shares his insights and expertise on the evolution of the sharing economy, consumer behaviour and alternative business models, and empowers consumers to rediscover and realise the enormous benefits of access over ownership and the potential savings in time, money, space, and the opportunity. Access is a cultural and socio-economic phenomenon that is transforming businesses, consumers, the way we live, work, learn, consume, commute, and play. Access is the new ownership. *Film Production eBook* GURMEET SINGH DANG,

Cultural Funding and Financing Carolina Dalla Chiesa, Anders Rykkja, 2026-01-03. This edited open access volume offers a comprehensive analysis of new and traditional funding models for the arts and culture. In the economic and political contexts of reduced art funding, the book takes an objective, pragmatic and heterodox approach to demonstrate how financial sustainability in the arts can be achieved via a range of top-down and bottom-up mechanisms which are valued either in terms of institutional or crowd-based legitimacy. The book aims to offer both a scholarly interpretation of established and emerging funding and financing practices within the cultural and creative sector, as well as guidance for artists, creators, and cultural programmers through various case studies and multiple examples of current practices. Contributions are divided into three sections. Section one outlines the most important traditional tools and models, while the second part covers the key contemporary practices premised on the use of digital platforms, and the final part introduces several case studies. The objective of this volume is to demonstrate that while traditional models show no signs of being supplanted, digitalisation has facilitated the emergence of new forms. Such an evolution has consequences for creators of works, as well as those willing to support them. The contributions address these issues by investigating and analysing the individual or combined adoption of traditional and new funding and financing models in a post-digital context. **Europe Tourism eBook** GURMEET SINGH DANG, *De Gruyter Handbook of Media Economics* Ulrike Rohn, M.
