### **Innovative Pricing Strategies to Increase Profits, Second Edition** Daniel

Marburger, 2015-09-08 Perhaps the most confounding characteristic of the competitive marketplace is that everyone wants a piece of the action If a firm successfully enters a new market creates a new product or designs new innovations for an existing product it's just a matter of time before competitors follow suit And the influx of competition inevitably places downward pressure on both price and profitability Whether you're an economics student or a manager with absolutely no background in economics this book will help you make better decisions and learn more about the Five Forces Model first published in 1979 by Harvard economist Michael Porter which identifies the characteristics that can help insulate a firm

from competitive forces This book brings microeconomic theory into the world of the business manager rather than the other way around The author expounds on microeconomic theory enabling economists to take the knowledge back to the office and apply it

[Music Economy](#) Tim Anderson,2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge This book is not a definitive statement about what the new music industry is Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments
