Repay As You Earn Philip G. Schrag,2001-11-30 In 1993 Congress created a student loan repayment plan intended to enable high debt graduates to accept low income public service jobs by reducing their loan payments and eventually forgiving part of their debts But this Congressional initiative only helps those with catastrophically low incomes It has failed to attract many users because as implemented through regulations of the U S Department of Education it requires payment over too long a period 25 years before forgiveness Many students go to graduate and professional schools in pursuit of careers in public service But they often must borrow 100 000 or more to finance their education Their loan repayment obligations become so high that they can no longer afford to follow their ideals and they abandon their plans to have public service careers and seek employment with corporations or firms offering high salaries The income contingent repayment plan should have appealed to would be public interest lawyers who are among the graduates with the highest debt to income ratios but the plan has failed them and Schrag explores why and how the plan should be reformed either by Congress or by the federal administration

Game of Loans Beth Akers,Matthew M. Chingos,2016-09-20 Why fears about a looming student loan crisis are unfounded and how they obscure what s really wrong with student lending College tuition and student debt levels have been rising at an alarming pace for at least two decades These trends coupled with an economy weakened by a major recession have raised serious questions about whether we are headed for a major crisis with borrowers defaulting on their loans in unprecedented numbers and taxpayers being forced to foot the bill Game of Loans draws on new evidence to explain why such fears are misplaced and how the popular myth of a looming crisis has obscured the real problems facing student lending in America Bringing needed clarity to an issue that concerns all of us Beth Akers and Matthew Chingos cut through the sensationalism and misleading rhetoric to make the compelling case that college remains a good investment for most students They show how in fact typical borrowers face affordable debt burdens and argue that the truly serious cases of financial hardship portrayed in the media are less common than the popular narrative would have us believe But there are more troubling problems with student loans that don t receive the same attention They include high rates of avoidable defaults by students who take on loans but don t finish college the riskiest segment of borrowers and a dysfunctional market where competition among colleges drives tuition costs up instead of down Persuasive and compelling Game of Loans moves beyond the emotionally charged and politicized talk surrounding student debt and offers a set of sensible policy proposals that can solve the real problems in student lending

The Importance of Financial Resources for

Student Loan Repayment Lance Lochner, Todd R. Stinebrickner, Utku Suleymanoglu, National Bureau of Economic Research, 2013 Government student loan programs must balance the need to enforce repayment among borrowers who can afford to make their payments with some form of forgiveness or repayment assistance for those who cannot. Using unique survey and administrative data from the Canada Student Loan Program we show that nearly all recent borrowers with annual incomes above 40 000 make their standard loan payments while repayment problems are common among borrowers earning less than 20 000. Still over half of all low income borrowers manage to make timely payments. We demonstrate that other financial resources in the form of savings and family support are key to understanding this. Repayment problems are rare among low earners with access to savings and family support. This has important policy implications in part because many recent proposals have advocated for a move to an income based repayment system. Under such a system many low income borrowers in good standing due primarily to savings and family support would pay less while little new revenue would likely be generated from inducing payment among those that are currently delinquent or in default since their income levels are so low. Specifically we show that expanding Canada's income based Repayment Assistance Plan to automatically cover all borrowers could reduce revenue by nearly one half over the first few years of repayment. Although a sizeable group of recent borrowers would benefit from improved repayment assistance our results suggest caution before broadly expanding assistance to all low income borrowers many of whom already benefit from informal insurance provided by savings and their families.
