Regulating Professions Tracey L Adams, 2018-08-08 Self regulation has long been at the core of sociological understandings of what it means to be a profession. However the historical processes resulting in the formation of self regulating professions have not been well understood. In *Regulating Professions* Tracey L Adams explores the emergence of self regulating professions in British Columbia, Ontario, Quebec and Nova Scotia from Confederation to 1940. Adams's in depth research reveals the backstory of those occupations deemed worthy to regulate such as medicine, law, dentistry and land surveying and how they were regulated. Adams evaluates sociological explanations for professionalization and its regulation by analysing their applicability to the Canadian experience and especially the role played by the state. By considering the role of all those involved in creating the professional landscape in Canada, Adams provides a clear picture of the process and illuminates how important this has been in building Canadian institutions and society.

A Source Book of Royal Commissions and Other Major Governmental Inquiries in Canadian Education, 1787-1978 Cary F. Goulson, 1981-12-15 This is a comprehensive primary reference to a rich and often neglected storehouse of information on Canada's educational background. As the boundary between full fledged royal commissions and other official governmental inquiries is not always clear and many legislative committee inquiries and special department of education investigations have been as significant in educational development as regular commissions. Goulson has included all major ministerial level governmental inquiries in Canadian education between 1787 and 1978. More than 300 inquiries are included among them general, special interest, judicial, legislative, parliamentary and other governmental committees. The information provided for each includes the type of commission or committee, its size, chairman, purpose, dates of appointment and reporting, and primary source references as well as a selection of its major conclusions and/or recommendations. Official governmental records and documents including the Reports themselves, Legislative Journals, House Debates and Hansard, Sessional Papers, Statutes and Department of Education records were used as the resource base. This volume will be of specific interest to teachers and students of the history of education and most educators no matter what their fields will find it useful.

Private Practice, Public Payment David Naylor, 1986-09-01 Naylor's particular concern is with the nature and extent of the medical profession's opposition at both the provincial and federal levels. He details various developments in medical politics and policies including the dispute over state health insurance plans in British Columbia during the depression, the national health insurance program drafted by the King government, the doctors strike in Saskatchewan and the development and eventual governmental rejections of prepayment plans sponsored by organized medicine. The author concludes that physicians regarded medical insurance schemes over which they had little administrative control or where coverage was not

limited to the indigent or to those earning below a modest wage as threats to professional incomes and autonomy His analysis of the evolution of the professional perspectives policies and pressure group activities suggests that physicians are as likely to act in their own economic and social interest as any other group and that they oppose legislation that would threaten these interests while supporting laws that strengthen them Since the Medical Care Act became law Ottawa has moved to strengthen health care plans in the provinces and once again the medical profession has resisted The final chapter in Naylor s book puts these current conflicts in historical perspective by linking them to their political precedents
