**PREPPERS: HISTORY AND THE CULTURAL PHENOMENON** Lynda King,2014-08-07 The word prepper seems to have burst onto the scene within the last 10 years and has increasingly become associated with fringe extremists They have been labeled by some as domestic terrorists But is prepping a new phenomenon Or is it a manifestation of a growing collective psyche that has learned from traumatic events throughout our history that preparedness is critical to human survival For new preppers who think the worst is yet to come this book offers a walk through history that shows the worst has been here before For those who wonder why so many people are concerned about being prepared this book will show that when the worst has made an appearance those who weathered it best were those who were prepared For those already familiar with history's worst who think THAT will never happen again this book offers a reminder of the Wall Street adage Past performance is no guarantee of future results For those who wonder what a prepper is this book offers a look at what they used to be and what they are today

**Bracing for the Apocalypse** Anna Maria Bounds,2020-06-04 Increasing American fear about terrorism environmental catastrophes pandemics and economic crises has fueled interest in prepping confronting disaster by mastering survivalist skills This trend of self reliance is not merely evidence of the American belief in the power of the individual rather this pragmatic shift away from expecting government aid during a disaster reflects a weakened belief in the bond between government and its citizens during a time of crisis This ethnographic study explores the rise of the urban preppers subculture in New York City shedding light on the distinctive approach of city dwellers in preparing for disaster With attention to the role of factors such as class race gender and one's expectations of government it shows that how one imagines Doomsday affects how one prepares for it Drawing on participant observation the author explores preppers views on the central question of whether to bug out or hunker down in the event of disaster and examines the ways in which the prepper economy increases revenue by targeting concerns over developing skills building networks securing equipment and arranging a safe locale A rich qualitative study Bracing for the Apocalypse will appeal to scholars of sociology and anthropology with interests in urban studies ethnography and subcultures

**Techniques For Beginner's** Old Natural Ways, 2021-08-30 The prepper's pantry is a very important part of their survival kit. It usually consists of a large refrigerator that stores a lot of perishables and canned goods a small stove with stoves some utensils such as knives large pots pans baking pans and the most important a collection of freeze dried foods. They have a variety of different foods to provide for different needs for example if someone in the family is diabetic they may need a special type of diabetic food or they may just need something to keep them warm during severe weather. This guide will give you some tips on what foods you should have on hand. This guide will also give you information on what foods you should avoid having in your prepper's pantry. This will help ensure that you are providing for your family's needs instead of just going off half-cocked when disaster strikes. You want to be prepared so that you do not have to rely on others to feed you. Following this guide will ensure that you have enough food storage to last you through at least two weeks without any problems. If you have a prepper in your family it is very important to talk to him or her about the type of pantry they have. In fact many preppers are starting to do their own grocery shopping so that they know where to buy the best foods at all times. This will save them a lot of money. Some families even go so far as to buy freeze dried foods that are packed in cans. It saves them time because it can get overwhelming to sort through all of the different brands. Another thing you should have in your hidden prepper's pantry bed are multiple cans of powdered drinking water. Many preppers depend on canned foods for their survival food supply. However most people that live in an area where there is no running water do not know how to properly store the canned foods. With the proper pantry and a good storage system you can easily prepare healthy meals for your family.
