## **Survivor Taking Control Of Your Fight Against Cancer:**

**Survivor** Laura Landro,1998-06-01 Shortly after her thirty seventh birthday Wall Street Journal reporter and editor Laura Landro was told that she had chronic myelogenous leukemia Survivor is the remarkable account of her battle against this devastating potentially fatal cancer and her successful struggle to take control of her own case At first almost paralyzed with fear when diagnosed with this form of blood cancer Landro resolved to use her journalistic training to seek out the treatment that would give her the best shot at surviving Noting that most Americans spend more time researching what kind of car to buy than they do their health care she shows how and why all patients can and must arm themselves with the facts learn to understand medical jargon get doctors to answer all their questions in layman s terms weigh conflicting medical opinions and make the difficult choice among the options open to them Landro s inspiring story offers all readers hope and the know how to navigate the terrifying and bewildering world of medicine even when they are very ill and at their most vulnerable

**Predictive Health** Kenneth L. Brigham,Michael M. E. Johns,2012-10-02 Our health care system is crippled by desperate efforts to prevent the inevitable A third of the national Medicare budget nearly 175 billion is spent on the final year of life and a third of that amount on the final month often on expensive and futile treatments Such efforts betray a fundamental flaw in how we think about healthcare we squander resources on hopeless situations instead of using them to actually improve health In Predictive Health distinguished doctors Kenneth Brigham and Michael M E Johns propose a solution invest earlier and use science and technology to make healthcare more available and affordable Every child would begin life with a post natal genetic screen when potential risk say for type II diabetes or heart disease would be found More data on biology behavior and environment would be captured throughout her life Using this information health care workers and the people they care for could forge personal strategies for healthier living long before a small glitch blows up into major disease This real health care wouldn t just replace much of modern disease care it would make it obsolete The result according to Brigham and Johns will be a life defined by a long stay at top physical and mental form rather than an early peak and long decline Accomplishing this goal will require new tools new clinics fewer doctors and more mentors smarter companies and engaged patients In short it will require a revolution Thanks to a decade long collaboration between Brigham Johns and others it is already underway An optimistic plan for reducing or eliminating many chronic diseases as well as reforming our faltering medical system Predictive Health is a deeply knowledgeable deeply humane proposal for how we can reallocate expenses and resources to prolong the best years of life rather than extending the worst
