Sustainability Of Rights After Globalisation:

Sustainability of Rights After Globalisation Antony Salvage, 2017-06 During the last few decades human dynamics institutional change political relations and the global environment have become successively more intertwined This increased global economic integration global forms of governance globally inter linked social and environmental developments are often referred to as globalisation However it can mean the growing integration of markets and nation states and the spread of technological advancements receding geographical constraints on social and cultural arrangements Foreign trade in goods and services capital technology and labour all move more freely across borders In addition to economic gains there have been significant benefits in the areas of culture and governance Public awareness of issues such as human rights democracy and gender equality has increased significantly because of the greater access to newspapers radio television telephones computers and the internet These developments have arguably led to improved allocative efficiency that in turn enhances growth and human development Sustainability of Rights after Globalisation presents an emphasis on various concerns of globalisation and its interface with rights It reinforces the view that trade employment and social policies need to be pursued together While globalisation is seen as a potential source of growth and poverty reduction a range of conditions need to be in place to maximize its benefits and ensure that those affected negatively are compensated This suggests an important role for governments in investing in public goods and in strengthening the functioning of different markets that are crucial for smooth and growth enhancing reallocation processes The important role of social protection in open economies is emphasised and the discussion highlights the need to adjust social protection systems to local conditions Responsible competitiveness means markets that systematically and comprehensively reward business for strategies and practices that take explicit account of the social economic and environmental impacts Making sustainable development count in tomorrow's markets requires political business and civil society leaders building effective public policies strengthening social conditions and supporting responsible markets Contributions to the monograph also highlight the role that education and skill development policies play in strengthening the labour forces ability to adjust to change and ensuring a wider distribution of the gains from trade

Knowledge and Human Liberation Ananta Kumar Giri, 2014-11-01 Human liberation has become an epochal challenge in today's world requiring not only emancipation from oppressive structures but also from the oppressive self It is a multidimensional struggle and aspiration in which knowledge self social and spiritual can play a transformative role Knowledge and Human Liberation Towards Planetary Realizations undertakes such a journey of transformation and seeks to rethink knowledge vis vis the familiar themes of human interest critical theory enlightenment ethnography democracy pluralism rationality secularism and cosmopolitanism The volume also features a Foreword by John Clammer United Nations University Tokyo and an Afterword by Fred Dallmayr University of Notre Dame

Global Environmental Constitutionalism in the Anthropocene Louis J Kotzé, 2016-09-22 There is persuasive evidence

suggesting we are on the brink of human induced ecological disaster that could change life on Earth as we know it There is also a general consensus among scientists about the pace and extent of global ecological decay including a realisation that humans are central to causing the global socio ecological crisis This new epoch has been called the Anthropocene Considering the many benefits that constitutional environmental protection holds out in domestic legal orders it is likely that a constitutionalised form of global environmental law and governance would be better able to counter the myriad exigencies of the Anthropocene This book seeks to answer this central question from the perspective of the Anthropocene what is environmental constitutionalism and how could it be extrapolated to formulate a global framework In answering this question this book offers the first systematic conceptual framework for global environmental constitutionalism in the epoch of the Anthropocene

Governance and Sustainability Ulrich Petschow, James Rosenau, Ernst Ulrich von Weizsäcker, 2017-09-29

Sustainability cannot be achieved without good governance The Johannesburg World Summit on Sustainable Development in 2002 stated that governance and sustainable development are intimately tied together and the future role and architecture of institutions from local to international levels will be crucial determinants to whether future policies and programmes for sustainable development will succeed But these are changing times With growing tensions over both globalization and regionalization traditional systems of regulation are being subjected to growing pressure for reform While states will continue to play a significant if changed role in the future the importance of players from business and civil society is increasing Sustainable development requires this change Such an intra and intergenerational concept cannot be achieved with a top down approach but rather needs the participation of all In fact the governance of sustainable development requires the exploration of new forms of both social co operation and confrontation By doing so the different levels global and local players state company and civil society control structures hierarchy market and public private and fields of action need to be taken into consideration Governance and Sustainability examines the possibilities of integrating the environmental social and economic dimensions of sustainable development within the framework of governance processes and how that might steer societies towards sustainability It takes a close look at the key actors their agendas and methods forms of organization problems and limits as well as real life examples for governance in different areas of society at the regional national and international level It is especially interested in exploring the nature of changes in the context of governance the role of actors in such processes and analysing how different forms of societal learning can improve governance processes It concludes that this is a continuous process characterized by conflicts and learning processes necessary to heighten both awareness of the complexity of the social and environmental problems faced and the prospects of implementing successful solutions Based on a major conference hosted to assess the issue of governance post Johannesburg the book includes innovative insights from some of the leading thinkers in both sustainable development and governance from academia business multilateral organizations and NGOs It provides a unique perspective on two of the key societal problems facing the

world today Research Handbook on Fundamental Concepts of Environmental Law Douglas Fisher,2022-11-25 This expanded and updated Research Handbook delivers an authoritative and in depth guide to the conceptual foundations of environmental law It offers a nuanced reflection on the underlying principles by exploring issues such as human rights constitutional rights sustainable development and environmental impact assessment within the context of environmental law

Improving standards and certification in agri-food supply chains Professor Louise Manning,Dr Amanda Hielm,Dr Gregory Sampson,Ms Pilar Pampin,Dr Jo Treweek,Dr Mona McCord,Ms Deanna Newsom,Dr Anna Thorning,Professor James Monaghan,Dr Evelien De Olde,2024-11-12 Considers a range of techniques used for measuring compliance and improving performance across the agri food supply chain including those used to measure on farm carbon footprints and biodiversity Provides a useful and comprehensive context to the role of governments and other food safety agencies in setting safety quality and sustainability standards for global agri food supply chains Reviews the key issues in developing voluntary standards focussing on those encountered during the development of robust carbon neutral and biodiversity offsetting certification schemes **Indian National Bibliography** B. S. Kesavan,2012 **Globalization, Environmental Law, and Sustainable Development in the Global South** Kirk W. Junker,Paolo Davide Farah,2021-11-29 This volume examines the impact of globalization on international environmental law and the implementation of sustainable development in the Global South Comprising contributions from lawyers from the Global South or who have experience in the Global South this volume is organized into three parts with a thematic inquiry woven through every chapter to ask how law can enable economies that can be sustained given the limited carrying capacity of the earth Part I describes and characterizes the status quo of environmental and economic problems in the Global South during the process of globalization Some of those problems include redistribution of environmental burden on the public through over reliance on the state in emerging economies and the transition to public private partnerships as well as extreme uncontrolled economic expansion Building on Part I Part II takes an international perspective by presenting some tools that are in place during the process of globalization that lead to friction and interfaces between developed and developing economies in environmental law Recognizing the impossibility of a globalized Northern economy the authors in Part III present some alternatives through framework ideas of human and civil rights environmental rights and indigenous persons rights as well as concrete and specific legal tools to strengthen justice and rule of law institutions The book gives new perspectives to familiar approaches through concrete examples by professional practitioners and theoretical discourse by academic researchers and can thereby form the basis for changes in practices as well as further discussions and comparisons This book will be of great interest to students and scholars of environmental law sustainable development and globalization and international relations as well as legal professionals and practitioners **Routledge Handbook of International Environmental Law** Shawkat Alam,2013 This handbook is an advanced level reference guide which provides a comprehensive and contemporary overview of the corpus of international

environmental law IEL **Capitalist Globalisation, Corporated Tourism and Their Alternatives** Freya Higgins-Desbiolles, 2009 Any realistic understanding of contemporary tourism in the 21st century must be grounded in a context of the dynamics of capitalist globalisation Sociologist Leslie Sklair's conceptualisation of capitalist globalisation and its dynamics as expressed in his *Sociology of the Global System* 2002 is employed to understand the corporatised tourism phenomenon and explain the resistance that it sparks This discussion explains how a corporatised tourism sector has been created by transnational tourism and travel corporations professionals in the travel and tourism sector transnational practices such as the liberalisation being imposed through the General Agreement on Trade in Services negotiations and the culture ideology of consumerism that tourists have adopted **Sustainable Development, Governance, Globalization**, 2002 **The Human Rights Impact of the World Trade Organisation** James Harrison, 2007-07 This book is an in depth analysis of the various ways in which international trade law rules impact upon human rights protection and promotion

Globalization, Development and Integration Pompeo Della Posta, Milica Uvalic, Amy Verdun, 2009-01-15 Globalization Development and Integration offers a European perspective on globalization It looks at some of the characteristics of the current phase of globalization such as the asymmetries in the way it manifests itself in daily life including the crucial and often controversial role played by agriculture and the effects that it produces on poverty and inequality throughout the world The book devotes particular attention to the problems experienced by developing countries by studying what the appropriate macroeconomic policies are to deal with globalization and how international labour markets work in a globalized economy

BOOK JACKET **Culture, Environmental Action and Sustainability** International Association for People-Environment Studies. Conference, Ricardo García Mira, José Romay Martínez, José Manuel Sabucedo Cameselle, 2003 Culture is an important mediator between behavior and the environment impacting on social participation and environmental action and thus in turn on sustainable development It is also of great significance in shaping our quality of life within the context of globalization both in urban and rural areas In this volume renowned researchers from around the world and from a variety of disciplines including psychology architecture design and urban planning take a global perspective in looking at the implications of culture and cultural differences for our quality of life and the way in which people interact These implications are illustrated using real world examples The contributions carefully selected and edited from presentations at the 17th Conference of the International Association for People Environment Studies IAPS held in A Coruña Spain deal with the following main themes Culture quality of life and globalization Environmental action and participation Urban sustainability and cultural diversity Children and the environment The elderly and the environment A useful tool for researchers students and those involved in decision making processes this book should contribute to the improved management of environmental resources within a framework of sustainability multiculturalism and responsible environmental action *Resurgence*, 2008

Globalisation & the Crisis of Sustainable Development Kok Peng Khor, 2001 Sociological Abstracts Leo P. Chall, 2004
