Facilities Management and Corporate Real Estate

Management as Value Drivers Per Anker Jensen, Theo van der Voordt, 2016-10-04 Facilities Management FM and Corporate Real Estate Management CREM are two closely related and relatively new management disciplines with developing international professions and increasing academic attention Both disciplines have from the outset a strong focus on controlling and reducing cost for real estate facilities and related services In recent years there has been a change towards putting more focus on how FM CREM can add value to the organisation This book is driven by the need to develop a widely accepted and easily applicable conceptual framework of adding value by FM and CREM It presents the state of the art of theoretical knowledge and empirical evidence about the impact of buildings and facilities on 12 value parameters and how to manage and measure these values The findings are connected to a new Value Adding Management model The book is research based with a focus on guidance to practice It offers a transdisciplinary approach integrating academic knowledge from a variety of different fields with practical experience It also includes 12 interviews with practitioners shedding light as to how they manage adding value in practice This is a much needed resource for practitioners researchers and teachers from the field of FM and CREM as well as students at both undergraduate and postgraduate level

Rethinking Sustainability in Facilities and Workplace Management

Frans Melissen, Bert Smit, Vitalija Danivska, Andrew Ngawenja

Mzembe,2022-08-19 This book discusses sustainability within the facility management industry However it is not another anthology of so called best practices and the seemingly endless range of certification schemes It is also not a marketing guide on how to communicate high pitched sustainability ambitions to potential customers to increase short term market share Instead this book is based on the realisation that most facility management businesses and departments actually find it hard to truly integrate sustainability into their strategies tactics and day to day operations in a coherent way It is also based on the reference point that sustainable development cannot be realised only through technological advancements and new procedures it requires new behavioural patterns of people Not only of your own employees as a supplier or department but also of those for whom you design stage and manage optimal workplace experiences Those patterns will not emerge from nowhere but need to be purposely created and cultivated based on a thorough understanding of what people and organisations need want and desire Through reviewing specific barriers and opportunities related to practical situations and examples at all three levels of facility management the operational tactical and strategic level and supported by the latest theoretical insights this book provides students and practitioners with inspiration and suggestions for using sustainability as a guideline for improving workplace experience concepts and FM strategies services and processes Each chapter uses specific cases and examples as the starting point for reflecting on avenues to move from treating sustainability as an add on to using it as a powerful concept to create optimal workplace experiences In doing so these reflections provide lecturers students and current and future professionals with practical guidelines and pointers to take sustainability within the facility management industry to a much needed next level

The Business of Sustainability Chris Laszlo,Karen Christensen,Daniel

S. Fogel,Gernot Wagner,Peter J. Whitehouse,2010-01-01 The Business of Sustainability is a core resource for policy makers members of the development community entrepreneurs and corporate executives as well as business and economics students and their professors It contains rich analysis of how sustainability is being factored into industries across the globe with enlightening case studies of businesses serving as agents of change Contributing authors provide a groundbreaking body of research based knowledge They explain that the concept of sustainability is being re framed to be positive about business instead of being tied to the old notion of a trade off between business and society that is if business wins society and the environment must lose and they explore how economic development can contribute to building our common future
