**The Making of the American Landscape** Michael P. Conzen, 1990      The Making of an American Landscape: Monterey Park, California Michael Ben Shirreffs, 1996      **The American Landscape** Stephen F. Mills, 2013-12-19 American landscapes are some of the best known images in the world we recognize Niagara Falls the Grand Canyon the Manhattan skyline and the streets of San Francisco in a thousand advertisements and TV shows But how have these places come to be as they are and why are some places familiar while others are quite unknown The American Landscape introduces the reader to the changing face of the American environment tracing the way in which the present array of forests and farms parks and superhighways cities and suburbs have come about and how these changes have been thought about painted turned into movie sets etc      Edges of the Experiment Hans Gremmen, 2014 Edges of the Experiment investigates the idyllic notion of the American landscape showing which elements contribute to the iconic landscape and at what cost they can be maintained It describes the thin line between nature and civilisation How did the landscape evolve and where are the interfaces between the organic and the artificial world and do they fail or succeed Edges of the Experiment is a two volume publication Volume one shows over 60 photographs made over a period of ten years by Jongerius Volume two is a collection of essays about the making of the American Landscape with texts by Matthew Coolidge William L Fox Hans Gremmen Taco Hidde Bakker Mark Pimlott Warren Techentin Raymond Frenken and others      **The New Explorers** Kris Timken, 2015-10-01      **Studyguide for the Making of the American Landscape by Conzen, Michael P.** Cram101 Textbook Reviews, 2013-05 Never HIGHLIGHT a Book Again Includes all testable terms concepts persons places and events Cram101 Just the FACTS101 studyguides gives all of the outlines highlights and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanies 9780872893795 This item is printed on demand      **Taking Measures Across the American Landscape** James Corner, James M. Corner, Alex S. MacLean, 1996-01-01 Photographs and essays express the way the American landscape has been forged by various cultures in the past and what the possibilities are for its future design Jacket      **Creating Colorado** William Wyckoff, 1999-01-01 Sprawling Piedmont cities ghost towns on the plains earth toned placitas set against the Sangre de Cristo Mountains mining camps transformed into ski resorts these are some of the diverse regions in Colorado explored in this fascinating book Historical geographer William Wyckoff traces the evolution of the state during its formative years from 1860 to 1940 chronicling its changing cultural landscapes social communities and connections to a larger America and showing that Colorado has exemplified the unfolding of a complex western environment Wyckoff discusses how nature capitalism a growing federal political presence and national cultural influences came together to produce a new human geography in Colorado He explains the ways in which the state's distinctive settlement geographies each took on a special character that persists to the present He leads the reader through the transformation of the state from wilderness to a distinct region capable of accommodating the diverse needs of ranchers

miners merchants farmers and city dwellers And he describes how a state created out of cartographic necessity has been given uniqueness and meaning by the people who live there **Myth, Memory, and the Making of the American Landscape** Paul A. Shackel, 2001 Penetrating insight into the processes by which our collective historical memory is constructed Through a range of case studies the authors explore how and why certain landscapes and monuments are intentionally endowed with specific messages why certain stories are obscured or forgotten and how collective memories change over time James Delle Franklin and Marshall College The authors in this collection show how the creation of a collective memory of highly visible objects and landscapes is an ongoing struggle their meanings always being constructed changed and challenged The sites and symbols the authors address are nationally recognized and include a balance of places that illuminate class ethnic racial and historical experiences Focusing on material culture they explore the tensions that exist among various groups elite landowners the National Park Service preservationists minority groups who compete for control over the interpretation of American public history

the effects of development and extraction industries in every region of the Continental United States over a period of seventeen years The subjects of Ganis s images are for the most part flagrantly clear abandoned wrecks desolate strip mines clear cut forests industrial parks landfill sites and the flattening of terrain for housing developments and just as flagrantly disturbing This is a thesaurus of our civilized incursions into the wildness of nature a charting of our debris strewn topographies and a cogent report on our abdication of any reverence towards the land In an introductory essay Robert Sobieszek from Los Angeles County Museum gives an insightful overview of the historical responses to the American landscape and places the work of John Ganis within the context of the new American pastoral In 1989 Ganis entered into a collaborative exchange with the noted anthropologist Dr Stanley Diamond who wrote the poetry for this book in response to John Ganis s photographs They represent some of his last and previously unpublished poetic work John Ganis established his reputation with work on important environmental issues His color photographs of land use in America have been exhibited widely and are in the collections of The Brooklyn Museum of Art The Center for Creative Photography The Detroit Institute of Arts The San Francisco Museum of Modern Art etc He is currently professor and photography department chair at the College for Creative Studies in Detroit **Modern American Landscapes** Mick Gidley,Robert Lawson-Peebles,1995

**Nature and Culture** Barbara Novak,2007-02-12 In this richly illustrated volume featuring more than fifty black and white illustrations and a beautiful eight page color insert Barbara Novak describes how for fifty extraordinary years American society drew from the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz H Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau and Frederich Wilhelm von Schelling Now with a new preface this spectacular volume captures a vast cultural panorama It beautifully demonstrates how the idea of nature served not only as a vehicle for artistic creation but as its ideal form An impressive achievement Barbara Rose The New York Times Book ReviewAn admirable blend of ambition elan and hard research Not just an art book it bears on some of the deepest fantasies of American culture as a whole Robert Hughes Time Magazine *The Changing American Countryside* Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and

comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life

**The American landscape**, 1981 *The Greenwood Encyclopedia of Homes through American History* Olivia Graf, Melissa Wells Duffes, Elizabeth B. Greene, Nancy Blumenstark Mingus, Leslie Humm Cormier Ph.D., Neal V. Hitch, Mark Edward Braun, Jane C. Busch, Brenda Kayzar, Thomas W. Paradis, 2008-03-30 Beginning with the homes of the first European settlers to the North American colonies and concluding with the latest trends in construction and design of houses and apartments in the United States *Homes through American History* is a four volume set intended for a general audience From tenements to McMansions from wattle and daub construction in early New England to sustainable materials for green housing these books provide a rich historical tour through housing in the United States Divided into 10 historical periods the series explores a variety of home types and issues within a social historical and political context For use in history social studies and literature classes *Homes through American History* identifies A brief historical overview of the era in order provide context to the discussion of homes and dwellings Styles of domestic architecture around the country Building material and manufacturing Home layout and design Furniture and decoration Landscaping and outbuildings

*Many Wests* David M. Wrobel, Michael C. Steiner, 1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West s regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived

Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists. Many books speak of the West as a place but few others deal with the West's different places. *Many Wests* presents a vision of the West that reflects both the common heritage and unique character of each major subregion, building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields. It is a book for everyone who lives in, studies or loves the West for it confirms that it is home to very different peoples, economies, histories, and regions.
