The Man Who Rode Sharks:

The Man who Rode Sharks William R. Royal, Robert Forrest Burgess, 1978 **Secrets of the Springs** Robin Brown, Scott Derks, 2020-12-01 This tale of two deep springs in Florida that began as sinkholes about 13 000 years ago and the story of the precious water they contained reveals the recent and prehistoric story of what is now the Sunshine State and the importance of its natural resources to its people The mineral charged spring water sustained Florida's earliest human populations roaming hunter gatherers who discovered the springs about 10 000 years ago and revisited them for thousands of years in dry times and preserved their bones and artifacts for thousands of years These dramatic tales based on the history of Florida's first people offer new perspectives on Florida's long history The second time period is recent and factual Often outrageously stranger than fiction it follows recent events in the history of the springs the remarkable people who dived in the deep water filled holes and put together the picture of human life ways 10 000 years ago at the end of the Pleistocene Era DNA analysis by world renown Svante Paabo revealed that these first Floridians were unrelated to the Native Americans living in North America today **The Art and Archaeology of Florida's Wetlands** Barbara A. Purdy, 2017-12-06 Waterlogged archaeological sites in Florida contain tools art objects dietary items human skeletal remains and glimpses of past environments that do not survive the ravages of time at typical terrestrial sites Unfortunately archaeological wet sites are invisible since their preservation depends upon their entombment in oxygen free organic deposits As a result they are often destroyed accidentally during draining dredging and development projects These sites and the objects they contain are an important part of Florida's heritage They provide an opportunity to learn how the state's earliest residents used available resources to make their lives more comfortable and how they expressed themselves artistically Without the wood carvings from water saturated sites it would be easy to think of early Floridians as culturally impoverished because Florida does not have stone suitable for creating sculptures This book compiles in one volume detailed accounts of such famous sites as Key Marco Little Salt Spring Windover Ft Center and others The book discusses wet site environments and explains the kinds of physical chemical and structural components required to ensure that the proper conditions for site formation are present and prevail through time The book also talks about how to preserve artifacts that have been entombed in anaerobic deposits and the importance of classes of objects such as wooden carvings dietary items human skeletal remains to our better understanding of past cultures Until now this information has been scattered in obscure documents and articles thus diminishing its importance Our ancestors may not have been Indians but they contributed to the state's heritage for more than 10 000 years Once disturbed by ambitious dredging and draining projects their story is gone forever it cannot be transplanted to another location Women in ichthyology: an anthology in honour of ET, Ro and Genie E.K. Balon, Michael N. Bruton, David L.G. Noakes, 2012-12-06 This special volume is dedicated to the contributions of women ichthyologists Three colleagues were selected to represent all women ichthyologists Ethelwynn Trewavas ET Rosemary Lowe McConnell Ro and

Eugenie Clark Genie All have had distinguished professional careers and have contributed in their own ways to their science The career of each is highlighted by a personal interview with one of the editors of the volume a bibliography of their lifetime publications and a biography of their careers Questions of historical inequities and current controversies in the treatment of women ichthyologists by their peers are raised and addressed by the women themselves The personal and professional influences of these three women and other women ichthyologists are highlighted A survey article by Pat Brown brings a number of women ichthyologists to the attention of a broader audience and points the way for a more comprehensive historical consideration of the accomplishments and contributions of women ichthyologists The volume continues with 16 solicited and contributed papers ET s studies of taxonomy and life history are echoed in papers on the taxonomy and systematics of marine angelfishes and of freshwater bitterlings a review of reproduction in the North Atlantic ichthyofauna and a comparison of reproductive styles and systematics of African minnows Ro s studies on ecology life history and behaviour are paralleled by papers on growth and metabolism in piranha the community structure in tide pool fishes and the social system and reproductive patterns in groupers Genie s pioneering work on sexual roles and sex change and her field studies of the behaviour of marine fishes are reflected in papers on gonadal structure and environmental sex determination in brook lamprey sexual patterns in hawfish reproduction and systematics in phallostethids gonadal structure and systematics in gobiids reproductive and predator avoidance behaviour in razorfish early ontogeny of an African mouth brooder and alternative life histories in killifish
