**The Managed Heart** Arlie Russell Hochschild, 2003 Publisher Description **The Managed Heart** Arlie Russell Hochschild, 1983 Arlie Hochschild examines two groups of public contact workers flight attendants and bill collectors The flight attendant's job is to deliver a service and create further demand for it to enhance the status of the customer and be nicer than natural The bill collector's job is to collect on the service and if necessary to deflate the status of the customer by being nastier than natural Between these extremes roughly one third of American men and one half of American women hold jobs that call for substantial emotional labor In many of these jobs they are trained to accept feeling rules and techniques of emotion management that serve the company's commercial purpose Like a physical laborer who becomes estranged from what he or she makes an emotional laborer such as a flight attendant can become estranged not only from her own expressions of feeling her smile is not her smile but also from what she actually feels her managed friendliness This estrangement though a valuable defense against stress is also an important occupational hazard because it is through our feelings that we are connected with those around us [Summary of The Managed Heart by Arlie Russell Hochschild](#) QuickRead, Lea Schullery, Learn about the commercialization of human feeling Does your job require you to engage in emotional labor That is are you required to bury your true feelings slap on a smile and engage with customers as if everything is fine We see people who work in customer service do this every day People like waitresses and flight attendants shockingly maintain an upbeat attitude throughout their day as they interact with hundreds of customers While many people believe these types of jobs don't require much labor they actually require some of the toughest skills that we don't often discuss emotional labor Each day these employees must hold back their emotions keep their cool and avoid getting upset But what's the true cost of this emotional work From a humanist and feminist perspective Hochschild describes the toll this process of estrangement has on our personal feelings and its role in becoming an occupational hazard in one third of America's workforce As you read you'll learn how emotional labor is used as currency in today's society and why women find their jobs more taxing than men Do you want more free book summaries like this Download our app for free at <https://www.quickread.com> App and get access to hundreds of free book and audiobook summaries **DISCLAIMER** This book summary is meant as a preview and not a replacement for the original work If you like this summary please consider purchasing the original book to get the full experience as the original author intended it to be If you are the original author of any book on QuickRead and want us to remove it please contact us at [hello@quickread.com](mailto:hello@quickread.com) **The Managed Heart** Arlie Russell Hochschild, 2012-03-31 In private life we try to induce or suppress love envy and anger through deep acting or emotion work just as we manage our outer expressions of feeling through surface acting In trying to bridge a gap between what we feel and what we ought to feel we take guidance from feeling rules about what is owing to others in a given situation Based on our private mutual understandings of feeling rules we make a gift exchange of acts of emotion management We bow to each

other not simply from the waist but from the heart But what occurs when emotion work feeling rules and the gift of exchange are introduced into the public world of work In search of the answer Arlie Russell Hochschild closely examines two groups of public contact workers flight attendants and bill collectors The flight attendant s job is to deliver a service and create further demand for it to enhance the status of the customer and be nicer than natural The bill collector s job is to collect on the service and if necessary to deflate the status of the customer by being nastier than natural Between these extremes roughly one third of American men and one half of American women hold jobs that call for substantial emotional labor In many of these jobs they are trained to accept feeling rules and techniques of emotion management that serve the company s commercial purpose Just as we have seldom recognized or understood emotional labor we have not appreciated its cost to those who do it for a living Like a physical laborer who becomes estranged from what he or she makes an emotional laborer such as a flight attendant can become estranged not only from her own expressions of feeling her smile is not her smile but also from what she actually feels her managed friendliness This estrangement though a valuable defense against stress is also an important occupational hazard because it is through our feelings that we are connected with those around us On the basis of this book Hochschild was featured in Key Sociological Thinkers edited by Rob Stones This book was also the winner of the Charles Cooley Award in 1983 awarded by the American Sociological Association and received an honorable mention for the C Wright Mills Award

than straight forward one off ones The book contends that these differences contribute unique characteristics to the nature of the emotional labour required and expounds and explores this new genus within the emotional labour species The main theme of this book is the explication and exploration of emotional labour in the context of leadership and management As such it focuses both on how our understanding of emotional labour in this context enriches the original construct and where it deviates from it By exploring these issues at the level of situated practices and the real world real time experiences of leaders the book seeks to make an innovative and nuanced contribution to our understanding of the emotional element within leadership work
