What Neoclassical Economics Debating Significance:

What is Neoclassical Economics? Jamie Morgan, 2015-11-19 Despite some diversification modern economics still attracts a great deal of criticism. This is largely due to highly unrealistic assumptions underpinning economic theory: explanatory failure, poor policy framing and a dubious focus on prediction. Many argue that flaws continue to owe much of their shortcomings to neoclassical economics. As a result what we mean by neoclassical economics remains a significant issue. This collection addresses the issue from a new perspective taking as its point of departure Tony Lawson's essay *What is this school called neoclassical economics?* Few terms are as controversial for pluralist and heterodox economists as neoclassical economics. This controversy has many aspects because the term itself has different specifications and connotations. Within this multiplicity what we mean by neoclassical matters to pluralist and heterodox economists for two primary reasons. First because it informs how we view and critique the mainstream; second because the relationship between heterodox and mainstream economics influences how heterodox economists model, apply methods and construct theory. The chapters in this collection each have different things to say about these matters with contributions ranging across the work of key thinkers such as Thorstein Veblen and Kenneth Arrow, applied issues of non linear modelling of dynamic systems and key events in the history of economics. This book will be of use to those interested in methodology, political economy, heterodoxy and the history of economic thought.

A Reflection on Sraffa's Revolution in Economic Theory Ajit Sinha, 2021-06-02 This book presents a substantial collection of essays from a wide range of well respected scholars addressing several aspects of Piero Sraffa's economics in light of continuing controversies over the interpretation that should be placed on his work. It moves beyond extant scholarship with an added emphasis on the philosophical dimension of Sraffa's seminal work *Production of Commodities by Means of Commodities*. Contributors probe new ways of thinking about the political economy of Sraffa and in doing so alongside the comments to each contribution by other scholars provide a cutting edge debate and discussion on non mainstream economic theory. This book will be of interest to academics and advanced graduate students in economics with additional interest from scholars in philosophy and the methodology of science.

Global Rentier Capitalism Balihar Sanghera, 2024-09-16 Recent work on rent and rentierism has offered a distinctive and fresh approach to understanding and explaining contemporary capitalism. Drawing on political economy, economics, geography and sociology this research has brought together distinct theoretical traditions in original and fertile ways to reshape the study of issues related to class, political economic change and environmental challenges. This book critically engages with these theoretical resources to analyse and evaluate economies in the Global North and South. It offers historical, theoretical and empirical accounts of rentierism, making important cross disciplinary and global connections. Its four parts address global rentier capitalism under the headings of historical lessons, theoretical developments and empirical studies of rentierism in the Global North and South. It will be the first book of its kind to offer a global account of rentier capitalism. It will be of immense interest to readers in

economics political economy sociology geography and development studies [Histories of Global Inequality](#) Christian Olaf Christiansen, Steven L. B. Jensen, 2019-07-09 This book argues that inequality is not just about numbers but is also about lived historical experience. It supplements economic research and offers a comprehensive stocktaking of existing thinking on global inequality and its historical development. The book is interdisciplinary drawing upon regional and national perspectives from around the world while seeking to capture the multidimensionality and multi causality of global inequalities. Grappling with what economics offers as well as its blind spots the study focuses on some of today's most relevant and pressing themes discrimination and human rights defences and critiques of inequality in history decolonization international organizations gender theory the history of quantification of inequality and the history of economic thought. The historical case studies featured respond to the need for wider historical research and to calls to examine global inequality in a more holistic manner. Economic Methodology, History and Pluralism Ioana Negru, Penelope Hawkins, 2022-12-30 Economic Methodology History and Pluralism Expanding Economic Thought to Meet Contemporary Challenges pays tribute to Emeritus Professor Sheila Dow University of Stirling Scotland. This volume focusses on the contributions of Dow to economic methodology pluralism and the history of economic thought. These explorations serve to underpin her ideas and theories on macroeconomics banking and money. Bringing together an impressive panel of contributors the chapters in this work examine Dow's writings on structured pluralism and schools of thought meanings of open and closed systems reflections on the relationship between economics and other sciences both social and natural the methodology of behavioural economics as well as the political economy of the Scottish school of thought. The book challenges the foundations of the mainstream economics paradigm in a novel and holistic manner seeking to advance thinking across Dow's favoured discipline. The essays in this collection provide thought provoking reading for advanced students and scholars of economic methodology the history of economic thought heterodox economics and political economy. The book will also be valued by the economics profession at large as it contains important elements and ideas concerning ethics methodology and tolerance within economics as a discipline and as a profession

Reclaiming economics for future generations Lucy Ambler, Joe Earle, Nicola Scott, 2022-01-25 Today's economies fail to recognise that we are in a rapidly worsening crisis reproducing and often worsening vast and harmful inequalities between people and countries. The current models are unsustainable and at a time when global temperatures are rising and divides are deepening humanity is left in a rapidly worsening situation of its own making the destruction of the living world which will make large parts of the earth uninhabitable. Without access to the knowledge skills or tools to build a better future local national and global economies will continue to fail to address the interlinked challenges of systemic racism inequalities faced by women the Covid 19 pandemic and the nature and climate emergency. Across the world economics students are coming together under the banner of the student movement Rethinking

Economics to create a better economics one which can help to create a world where all our children can flourish regardless of their gender background or birthplace Drawing on over sixty interviews with students and professionals from identities and backgrounds marginalised in economics and a wide range of global and historical research this book illustrates the ways in which the discipline is currently not fit for purpose and sets out a vision for how it can be diversified decolonised and democratised The struggle to reclaim economics could not be more crucial our futures depend on it This book explains how it can be done

Transfer State Peter Sloman, 2019-10-24 The idea of a guaranteed minimum income has been central to British social policy debates for more than a century Since the First World War a variety of market economists radical activists and social reformers have emphasized the possibility of tackling poverty through direct cash transfers between the state and its citizens As manufacturing employment has declined and wage inequality has grown since the 1970s cash benefits and tax credits have become an important source of income for millions of working age households including many low paid workers with children The nature and purpose of these transfer payments however remain highly contested Conservative and New Labour governments have used in work benefits and conditionality requirements to activate the unemployed and reinforce the incentives to take low paid work an approach which has reached its apogee in Universal Credit By contrast a growing number of campaigners have argued that the challenge of providing economic security in an age of automation would be better met by paying a Universal Basic Income to all citizens Transfer State provides the first detailed history of guaranteed income proposals in modern Britain which brings together intellectual history and archival research to show how the pursuit of an integrated tax and benefit system has shaped UK public policy since 1918 The result is a major new analysis of the role of cash transfers in the British welfare state which sets Universal Credit in a historical perspective and examines the cultural and political barriers to a Universal Basic Income

Markets William A. Jackson, 2019-04-18 Defining markets has never been an easy task Despite their importance for economic theory and practice they are hard to pin down as a concept and economists have tended to adopt simplified axiomatic models or rely on piecemeal case studies This book argues that an extended range of theory social as well as economic can provide a better foundation for the portrayal of markets The book first looks at the definition of markets their inadequate treatment in orthodox economic theory and their historical background in the pre capitalist and capitalist eras It then assesses various alternatives to orthodox theory categorised as social cultural structural functional and ethical approaches Among the alternatives considered are institutionalist accounts Marxian views network models performativity arguments field theories Austrian views and ethical notions of fair trade A key finding of the book is that these diverse approaches valuable as they are could present a more effective challenge to orthodoxy if they were less disparate Possibilities are investigated for a more unified theoretical alternative to orthodoxy Unlike most studies of markets this book adopts a fully interdisciplinary viewpoint expressed in accessible non technical language Ideas are brought together from heterodox economics social theory critical realism as well

as other social sciences such as sociology anthropology and geography Anybody seeking a broad critical survey of the theoretical analysis of markets will find this book useful and it will be of great interest to economists social scientists students and policy makers *Rent* Joe Collins,2021-12-07 The problem of rent is at the root of vital social concerns in the twenty first century ranging from the climate emergency and spiralling economic inequality to the repercussions of global economic crises But while many of us may be familiar with rent especially paying it how should we really understand it Examining both concrete contexts and complex concepts in this book Joe Collins provides a comprehensive but concise survey of the theories and debates over rent and rentier capitalism He examines global gentrification from S o Paolo to Dublin the tyranny of technology from Taipei to San Francisco and the excesses of extractivism from Sekondi to Karratha In doing so he reveals how rent is fundamental to the current dominant form of capitalist social organization across the globe and how we can prevent the next generation from seeing our societies rent asunder An essential resource for students and scholars alike this groundbreaking book will be of interest to anyone working on capitalism property political economy economic sociology and contemporary politics *Social Scientist* ,1991 **Post Keynesian Econometrics**,

Microeconomics and the Theory of the Firm Sheila C. Dow,John Hillard,2002 This is the first of two volumes celebrating Keynes contribution to economics and the development of post Keynesian economics in recent years The book is divided into three sections the first of which examines general issues including investment information labour economics and monetary theory In the second part the discussion is extended to uncertainty and addresses the associated issues of rationality trust and speculation The third and final section focuses on international economics and considers the theory of comparative advantage the fight against speculation in foreign exchange markets Tobin s transactions and the Maastricht Treaty **The**

Political Theory of Conservative Economists Conrad Waligorski,1990 A study of the political theory that underlies the conservative economic thought of such economists as Milton Friedman James Buchanan and Friedrich Hayek and its implications for public policy The author analyzes the political content of ideas that justify a laissez faire policy *Economic Thought and Discourse in the 20th Century* Warren J. Samuels,Jeff Biddle,Thomas W. Patchak-Schuster,1993 This work on the history of economics deals with three major figures Hicks Verblen and Marshall It describes Hicks theoretical stance on the functions of the history of economic thought Veblen s work on war and peace and the discursive structure of Marshall s work Economics *Ecological Economics Reviews, Volume 1186* Karin E. Limburg,Robert Costanza,2010-03-08 This is the inaugural volume in a series of reviews on the theory policy and implementation of sustainability and sustainable development with a focus on the economic social and environmental challenges facing the world today This volume includes papers by leading international experts in the science of sustainability including Rudolf de Groot Richard Cowling Bruce Hannon R Kerry Turner Peter Nijkamp Peter S derbaum Barry D Solomon and Pushpam Kumar NOTE Annals volumes are available for sale as individual books or as a journal For information on institutional journal subscriptions please visit www

Sunderlin, 2003 This book shows that polemical environmental and ecological debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems **Indian Economic Review**, 1994

Journal of Economic Literature, 2004 **A Development Manifesto** Mulyarto, 2005 **Encyclopedia of Business Ethics and Society** Robert W. Kolb, 2007-10-19 The five volumes of this ultimate resource recognize the inherent unity between business ethics and business and society that stems from their shared primary concern with value in commerce This Encyclopedia spans the relationships among business ethics and society by including more than 800 entries that feature broad coverage of corporate social responsibility the obligation of companies to various stakeholder groups the contribution of business to society and culture and the relationship between organizations and the quality of the environment

Structural Competitiveness in the Pacific Gavin Boyd, 1996 Trade and investment liberalization in the Pacific has highlighted the importance of structural competitiveness for both corporate executives and national policymakers In *Structural Competitiveness in the Pacific* a distinguished group of authors contributes to our understanding of patterns of structural competitiveness affecting trade and production links between East Asia and North America Interaction between national policies and corporate strategies has given East Asian states clear advantages over North American competitors The place of the Pacific in the world economy infrastructures and financial structures in the region American and Japanese structural competitiveness sourcing by Japanese and American multinationals in the Pacific as well as structural interdependencies and the potential for collective management across the region are all addressed in this volume Unlike previous comparative work addressing the decline in American competitiveness *Structural Competitiveness in the Pacific* takes into account the significance of transnational production by international firms and places US problems in a regional comparative context which includes Japan and the industrializing East Asian states
