## What We Cant Not Know:

*What We Can't Not Know* J. Budziszewski, 2003 According to the natural law a concept Christianity adopted and modified from Greek and Roman philosophy knowledge of God's existence and of fundamental moral principles constitutes humanity's universal common sense. It isn't innate however but must be inculcated through traditional moral systems such as the Tao the dharma and the Ten Commandments. Budziszewski invokes the last as best known to most of his potential readers and cites Judaic and Christian scripture yet this is no religious tract but a philosophical exposition and a disputation on current moral attitudes and issues especially abortion. Framing the entire presentation in terms of a lost world of moral consensus Budziszewski says the natural law grounds a rational worldview that has been discredited by sin and guilt and displaced by worldviews grounded in sensation he is particularly cogent on the varieties of modern atheistic or agnostic feelings. But the natural law weltanschauung could be reestablished and Budziszewski concludes his superb guide with broad advice on how to do so for one thing we must repent abortion. Ray Olson Copyright American Library Association

*What We Can't Not Know* J. Budziszewski, 2011-02-01 Revised and Expanded Edition In this new revised edition of his groundbreaking work Professor J. Budziszewski questions the modern assumption that moral truths are unknowable. With clear and logical arguments he rehabilitates the natural law tradition and restores confidence in a moral code based upon human nature. *What We Can't Not Know* explains the rational foundation of what we all really know to be right and wrong and shows how that foundation has been kicked out from under western society. Having gone through stages of atheism and nihilism in his own search for truth Budziszewski understands the philosophical and personal roots of moral relativism. With wisdom born of both experience and rigorous intellectual inquiry he offers a firm foothold to those who are attempting either to understand or to defend the reasonableness of traditional morality. While natural law bridges the chasms that can be caused by religious and philosophical differences Budziszewski believes that natural law theory has entered a new phase in which theology will again have pride of place. While religious belief might appear to hamper the search for common ground Budziszewski demonstrates that it is not an obstacle but a pathway to apprehending universal norms of behavior
