The doctor was adopted and has no known siblings or relatives. The doctor is offered an experimental stem cell transplant protocol and he matches someone from the international stem cell bank. The reader is led through the preparation for and the actual stem cell transplantation as seen through the eyes of an experienced physician with detailed treatments and unexpected side effects. The reader will tour the cutting edge of cancer treatment at one of the world's great institutions and its effect on two families separated by 3000 miles.
