Adventures in Coding is written specifically for young people who want to learn how to code but don't know where to begin. No experience? No problem! This book starts from the very beginning to take you from newbie to app builder in no time. You'll learn by doing as you build projects designed to help you master fundamental programming skills and you'll have a great time doing it. These skills form the foundation of any programmer's tool set and you'll continue to use them as you graduate to other devices and more difficult projects. Each chapter includes a video to help clear up any confusion and make sure you really understand so you can keep programming your way through every single project without hitting major roadblocks. If you're ready to start designing your own program, this book will help you get started today. More and more kids are learning to code and many schools offer basic programming classes as part of the regular curriculum. This book is structured like a class, starting with the basics and building skill upon skill, making it both a perfect accompaniment to formal instruction and an ideal guide for self-study. Learn the basic programming skills you'll use everywhere. Build nine fun projects from super basic to pretty challenging. Build the skills you need to create bigger and better apps. Watch video tutorials for extra help and explanations. How many times have you played with an app only to find yourself wishing it had this or that feature? If you learn how to code, you can be the creator of the next big app. But it all starts with that first small project. Adventures in Coding provides all the information you need, so let's get coding.

Mission Python Sean McManus, 2018-10-16. Program a graphical adventure game in this hands-on, beginner-friendly introduction to coding in the Python language. Launch into coding with Mission Python, a space-themed guide to building a complete computer game in Python. You'll learn programming fundamentals like loops, strings, and lists as you build. Escape an exciting game with a map to explore, items to collect, and tricky logic puzzles to solve. As you work through the book, you'll build exercises and mini projects like making a spacewalk simulator and creating an astronaut's safety checklist that will put your new Python skills to the test. You'll learn how to use Pygame Zero, a free resource that lets you add graphics and sound effects to your creations, and you'll get useful game-making tips such as how to design fun puzzles and intriguing maps. Before you know it, you'll have a working, awesome game to stump your friends with, and some nifty coding skills, too. You can follow this book using a Raspberry Pi or a Microsoft Windows PC, and the 3D graphics and sound effects you need are provided as a download.
