**Writing in a Second Language** Brian Paltridge,Sue Starfield,2007-06-11 The relationship of supervisor to student has traditionally been seen as one of apprenticeship in which much learning is tacit with the expectation that the student will become much like the tutor The changing demographics of higher education in conjunction with imperatives of greater accountability and support for research students have rendered this scenario both less likely and less desirable and unfortunately many supervisors are challenged by the task of guiding non native speaker students to completion This handbook is the ideal guide for all supervisors working with undergraduate and postgraduate non native speaker students writing a thesis or dissertation in English as it explicitly unpacks thesis writing using language that is accessible to research supervisors from any discipline **A Handbook for Doctoral Supervisors** Stan Taylor,Nigel Beasley,2005-07-27 This book focuses on the practical needs of supervisors drawing examples from a wide range of countries and using self interrogation as a means of encouraging readers to reflect upon their practice making it an essential read for anyone involved

**Undergraduates in a Second Language** Ilona Leki,2007 This is the first book length study of bilingual international and immigrant students in English writing courses that attempts to fully embed their writing experiences within the broader frame of their personal histories the human context of their development and the disciplinary contexts of their majors It

addresses the questions How useful are L2 writing courses for the students who are required to take them What do the students carry with them from these courses to their other disciplinary courses across the curriculum What happens to these students after they leave ESL English or writing classes Drawing on data from a 5 year longitudinal study of four university students for whom English was not their strongest primary language it captures their literacy experiences throughout their undergraduate careers The intensive case studies answer some questions and raise others about these students academic development as it entwined with their social experiences and identity formation and with the ideological context of studying at a US university in the 1990s *The Research Student's Guide to Success* Pat Cryer,2000-10 The first edition of Professor Cryer s book was absolutely outstanding in four main respects First it is comprehensive in its scope covering everything from applying to undertaking a research degree Second it is applicable to PhDs across the board Third the book is exceptionally well written and highly readable Finally at each stage Pat Cryer has included questions and exercises to enable readers to reflect on their practice check out whether they are on track and if not discover how they might return themselves to it Overall Pat Cryer has made a major contribution to the field and produced a quite exceptional book It ought to be compulsory reading for intending or actual postgraduates and for academic staff teaching research training programmes Assessment a wider understanding of the term research student to embrace all postgraduate students undertaking research whether for traditional PhDs and MPhils or within programmes such as professional doctorates taught masters degrees diplomas and certificates information technology as a day to day tool There are also two new chapters one on options for postgraduate study and research and the other on skills development and employment issues There is a foreword by Professor Sir Martin Harris Chair of the National UK Review of Postgraduate Education *Critical Thinking and Learning* Mark Mason,2008-05-27 This collection of papers evaluates the goals of critical thinking and of life long and life wide learning all of which appear frequently in the rhetoric of educational reform It discusses what these concepts mean and what societal cultural and educational issues arise from them **Cross-cultural Perspectives on Educational Research** Anna Robinson-Pant,2005 Annotation **The British National Bibliography** Arthur James Wells,2000 The Enquiring University Teacher Stephen Rowland,2000 The Enquiring University Teacher is an engaging account of an approach to professional development in which one s own teaching is an exiting field of enquiry It emphasizes the intrinsic interest of learning about university teaching with colleagues who bring their insights from different subject backgrounds and thereby provide a richer understanding of teaching and the learning processes The book explores the nature of the university teacher s enquiry a form of professional learning which is both collaborative and personally reflective It involves questioning personal and intellectual values and placing these at the center of university teaching The book is deeply thoughtful yet accessible to academics from all disciplines who may have no specialist educational background While it is suitable for all disciplines who may have no specialist educational background While it is suitable for the relatively new as well as the more experienced

university teacher it encompasses a view of teaching and learning that challenges many common conceptions about university teaching and its relationship to disciplinary research      **Register of Educational Research in the United Kingdom** ,1995      **Eleven Practices of Effective Postgraduate Supervisors** Richard James,1999      □□□□□□□□ □□□□□□
