financial markets *Trading without Indicators* Jose Mosca, Learning the trading business from the ground up can be daunting so Trading without Indicators is definitely a good starting point for you I encourage you to read it as many times as it takes for it to become clear to you as to what you do and do not need to learn to be successful in this business from the start and why you don t need to use indicators to make trading decisions There are no money back guarantees in the financial markets and you must know the right information from the start to have a chance of becoming consistently profitable and financially successful indicators give you the wrong information and can cause a trader to make grave mistakes causing them to lose all their hard earned money Most brand new traders spend many many hours looking for that magical combination of indicators that will reveal the Holy grail of winning trading strategies when they should instead be spending their time on learning what makes the market actually work which is supply and demand This short book tells you how to invest and trade right from the beginning of your career without the use of any indicators and tells you why you don t need them and how to read a price chart at a glance to see where the smart money is working from so you can work there also The professional advice I give you in this book will empower you to have confidence and zero fear of going in the live markets and accurately initiating a low risk high reward position with which you can have a high probability outcome from being a live market participant and do it while not using any indicators on your trading charts Becoming a successful self directed investor and trader is not nearly as difficult as one would think as long as they have the proper education and proper knowledge base right from day one it takes a while but you can do it and you can do without using indicators
