## **Surface Active Monomers Synthesis Properties And Application Springerbriefs In Materials:**

Surface Active Monomers Mykola Borzenkov,Orest Hevus,2014-07-01 This brief includes information on the background of and development of synthesis of various types of surface active monomers The authors explain the importance of utilization of surface active monomers for creation of surface active polymers and the various biomedical applications of such compounds This brief introduces techniques for the synthesis of novel types of surface active monomers their colloidal and polymerizable properties and application for needs of medicine and biology

### **Polyhydroxyalkanoates from Palm Oil:**

**Biodegradable Plastics** Kumar Sudesh,2012-10-11 The environmental problems caused by petroleum based plastic and plastic waste have led to an increasing demand for biobased and biodegradable plastics such as polyhydroxyalkanoates PHAs These polyesters are synthesized from carbon sources e g sugar and plant oils by various bacteria This book highlights the potential of plant oils especially palm oil as a feedstock for PHA production In addition new PHA applications are discussed and the sustainability of PHA production from plant oils is critically examined

### **Monomers, Oligomers, Polymers,**

**Composites and Nanocomposites Research: Synthesis, Properties and Applications** Richard Arthur Pethrick,Gennadii Efremovich Zaikov,Jan Pielichowski,2008-10 The role of polymer chemistry pure and applied sciences is very prominent in the world of science today but it is heading away from polymers and polymer blends towards composites and nanocomposites This allows for the creation of new materials with unique properties and new possibilities which is the subject of this book

Polyimides and Other High-temperature Polymers K. L. Mittal,2009-04-24 The topics covered in this proceedings volume include Synthesis characterization and processing including some novel approaches of a variety of polyimides and other high temperature polymers structure property relationships segmental dynamics in polyimide materials photoalignable polyimides photoconductivity and photosensitivity of polyimides ultrafiltration membranes from polyetherimide polymer materials for nonlinear optical applications alignment of SWNTs in rigid rod polymer compositions surface modification of polyimide adhesion of Cu to polyimide surfaces and polyimide erosion in a low Earth orbit space environment

### **Monomers, Polymers and Composites from Renewable Resources**

Mohamed Naceur Belgacem,Alessandro Gandini,2011-10-10 The progressive dwindling of fossil resources coupled with the drastic increase in oil prices have sparked a feverish activity in search of alternatives based on renewable resources for the production of energy Given the predominance of petroleum and carbon based chemistry for the manufacture of organic chemical commodities a similar preoccupation has recently generated numerous initiatives aimed at replacing these fossil sources with renewable counterparts In particular major efforts are being conducted in the field of polymer science and technology to prepare macromolecular materials based on renewable resources The concept of the bio refinery viz the rational exploitation of the vegetable biomass in terms of the separation of its components and their utilisation as such or after suitable chemical modifications is thus gaining momentum and considerable financial backing from both the public and private sectors This collection of chapters each one written by

internationally recognised experts in the corresponding field covers in a comprehensive fashion all the major aspects related to the synthesis characterization and properties of macromolecular materials prepared using renewable resources as such or after appropriate modifications Thus monomers such as terpenes and furans oligomers like rosin and tannins and polymers ranging from cellulose to proteins and including macromolecules synthesized by microbes are discussed with the purpose of showing the extraordinary variety of materials that can be prepared from their intelligent exploitation Particular emphasis has been placed on recent advances and imminent perspectives given the incessantly growing interest that this area is experiencing in both the scientific and technological realms Discusses bio refining with explicit application to materials Replete with examples of applications of the concept of sustainable development Presents an impressive variety of novel macromolecular materials    **Optically Active Polymers** Pradip K. Dutta, Vinod Kumar, 2016-09-16 This book presents a systematic study of the synthesis of optically active polymers discussing in detail the syntheses of three different types of optically active polymers from helical polymers dendronized polymers and other types of polymeric compounds It also explains the syntheses of optically active azoaromatic and carbazole containing azoaromatic polymers and copolymers optically active benzodithiophene and optically active porphyrin derivatives The final chapter discusses different properties of optically active polymers such as nonlinear optical properties chiroptical properties vapochromic behaviour absorption and emission properties fabrication and photochromic properties The intrinsic details of various properties of optically active polymers will offer a valuable resource for researchers and industry personnel actively engaged in application oriented investigations    **Polyimides and other high temperature polymers** K. L. Mittal, 2003-03 Annotation Containing 32 peer reviewed papers this volume documents the proceedings of the international symposium of the same name held under the aegis of the Materials Science and Technology Conferences in December of 2001 Devoted to research into high temperature polymers the papers are organized into sections dealing with synthesis properties and bulk characterization in the first half and surface modification interfacial or adhesion aspects and applications in the second Annotation c 2003 Book News Inc Portland OR booknews.com    **Synthesis of Inisurfs (surface Active Initiators) and Their Application in Emulsion Polymerization** M.
