Civil Engineering and Symmetry Edmundas Kazimieras Zavadskas, Jurgita Antuchevičienė, Romualdas Bausys, 2019-06-14 A topic of utmost importance in civil engineering is finding optimal solutions throughout the life cycle of buildings and infrastructural objects including their design manufacturing use and maintenance Operational research management science and optimization methods provide a consistent and applicable groundwork for engineering decision making These topics have received the interest of researchers and after a rigorous peer review process eight papers have been published in this

Special Issue The articles in this Printed Edition demonstrate how solutions in civil engineering which bring economic social and environmental benefits are obtained through a variety of methodologies and tools Usually decision makers need to take into account not just a single criterion but several different criteria and therefore multi criteria decision making MCDM approaches have been suggested for application in five of the published papers the rest of the papers apply other research methods Most approaches suggested decision models under uncertainty proposing hybrid MCDM methods in combination with fuzzy or rough set theory as well as D numbers The application areas of the proposed MCDM techniques mainly cover production manufacturing engineering logistics and transportation and construction engineering and management We hope that a summary of the Special Issue as provided here will encourage a detailed analysis of the papers included in the Printed Edition

The First City on Mars: An Urban Planner's Guide to Settling the Red Planet Justin B. Hollander, 2023-02-01

Hundreds of novels films and TV shows have speculated about what it would be like for us Earthlings to build cities on Mars To make it a reality however these dreamers are in sore need of additional conceptual tools in their belt particularly a rich knowledge of city planning and design Enter award winning author and Tufts University professor Justin Hollander In this book he draws on his experience as an urban planner and researcher of human settlements to provide a thoughtful exploration of what a city on Mars might actually look like Exploring the residential commercial industrial and infrastructure elements of such an outpost the book is able to paint a vivid picture of how a Martian community would function the layout of its public spaces the arrangement of its buildings its transportation network and many more crucial aspects of daily life on another planet Dr Hollander then brings all these lessons to life through his own rendered plan for Aleph one of many possible designs for the first city on Mars Featuring a plethora of detailed cutting edge illustrations and blueprints for Martian settlements this book at once inspires and grounds the adventurous spirit It is a novel addition to the current planning underway to colonize the Red Planet providing a rich review of how we have historically overcome challenging environments and what the broader lessons of urban planning can offer to the extraordinary challenge of building a permanent settlement on Mars
