Enabling Manufacturing Competitiveness and Economic Sustainability Michael F. Zaeh, 2013-09-12 The changing manufacturing environment requires more responsive and adaptable manufacturing systems. The theme of the 5th International Conference on Changeable Agile Reconfigurable and Virtual production (CARV2013) is Enabling Manufacturing Competitiveness and Economic Sustainability. Leading edge research and best implementation practices and experiences which address these important issues and challenges are presented. The proceedings include advances in manufacturing systems design, planning, evaluation, control and evolving paradigms such as mass customization, personalization, changeability, reconfigurability and flexibility. New and important concepts such as the dynamic product families and platforms, co-evolution of products and systems and methods for enhancing manufacturing systems economic sustainability and prolonging their life to produce more than one product generation are treated. Enablers of change in manufacturing systems production volume and capability, scalability and managing the volatility of markets, competition among global enterprises and the increasing complexity of products, manufacturing systems and management strategies are discussed. Industry challenges and future directions for research and development needed to help both practitioners and academicians are presented. About the Editor: Prof. Dr. Ing. Michael F. Zaeh, born in 1963, has been and is Professor for Manufacturing Technology since 2002 and together with Prof. Dr. Ing. Gunther Reinhart, Head of the Institute for Machine Tools and Industrial Management (iwb) at the Technische Universität München (TUM). After studying general mechanical engineering, he was doctoral candidate under Prof. Dr. Ing. Joachim Milberg at TUM from 1990 until 1993 and received his doctorate in 1993. From 1994 to 1995 he was department leader under Prof. Dr. Ing. Gunther Reinhart. From 1996 to 2002 he worked for a machine tool manufacturer in several positions, most recently as a member of the extended management. Prof. Dr. Ing. Michael F. Zaeh is an associated member of the CIRP and member of acatech, WGP and WLP. His current researches include, among others, Joining and Cutting Technologies like Laser Cutting and Welding as well as Friction Stir Welding, Structural Behaviour and Energy Efficiency of Machine Tools and Manufacturing Processes like Additive Manufacturing.

Mobile Devices and Smart Gadgets in Medical Sciences Umair, Sajid, 2020-02-21 Each day new applications and methods are developed for utilizing technology in the field of medical sciences both as diagnostic tools and as methods for patients to access their medical information through their personal gadgets. been realized Mobile Devices and Smart Gadgets in Medical Sciences is a pivotal reference source that explores different mobile applications tools software and smart gadgets and their applications within the field of healthcare Covering a wide range of topics such as artificial intelligence telemedicine and oncology this book is ideally designed for medical practitioners mobile application developers technology developers software experts computer engineers programmers ICT innovators policymakers researchers academicians and students

The Systemic Image Inge Hinterwaldner,2017-01-13 A new conceptualization of the relationship between the systemic and the iconic in real time simulations that distinguishes among four levels of forming Computer simulations conceive objects and situations dynamically in their changes and progressions In The Systemic Image Inge Hinterwaldner considers not only the technical components of dynamic computer simulations but also the sensory aspects of the realization Examining the optic the acoustic the tactile and the sensorimotor impressions that interactive real time simulations provide she finds that iconicity plays a dominant yet unexpected role Based on this and close readings of a series of example works Hinterwaldner offers a new conceptualization of the relationship between systemic configuration and the iconic aspects in these calculated complexes Hinterwaldner discusses specifications of sensorialization necessary to make the simulation dynamic perceivable Interweaving iconicity with simulation she explores the expressive possibilities that can be achieved under the condition of continuously calculated explicit changes She distinguishes among four levels of forming the systems perspective as a process and schema that establishes the most general framework of simulations the mathematical model which marks off the boundaries of the simulation s actualization the iconization and its orientation toward the user and interaction design necessary for the full unfolding of the simulation The user makes manifest what is initially latent Viewing the simulation as an interface Hinterwaldner argues that not only does the sensorially designed aspect of the simulation seduce the user but the user also makes an impact on the simulation on the dynamic and perhaps on the iconization although not on the perspectivization The influence is reciprocal

Learning in Organizations J. Kevin Ford,2020-11-25 Learning in Organizations An Evidence Based Approach examines the variety of systematic approaches and strategies for learning and development used in the workplace through the implementation of formal training guided instruction developmental job experiences and self directed learning The hallmark of Learning in Organizations is an emphasis on research evidence of what is and is not known about learning and learning strategies and the translation of that evidence to guide best practices in workplace learning and development The book features evidence on learning principles new learning technologies and strategies for developing individual team and leadership capabilities The content of the chapters is enhanced by the inclusion of key learning goals for each chapter case studies chapter summaries best practice recommendations and a hands on project for use in the classroom Learning in Organizations provides researchers with a detailed investigation of learning practices to help drive future research For learning practitioners research evidence is translated into best practices that can be applied to enhance workplace learning and
