## **Sustainability A Philosophy Of Adaptive Ecosystem Management:**

**Sustainability** Bryan G. Norton, 2005-11 While many disciplines contribute to environmental conservation there is little successful integration of science and social values Arguing that the central problem in conservation is a lack of effective communication Bryan Norton shows in Sustainability how current linguistic resources discourage any shared multidisciplinary public deliberation over environmental goals and policy In response Norton develops a new interdisciplinary approach to defining sustainability the cornerstone of environmental policy using philosophical and linguistic analyses to create a nonideological vocabulary that can accommodate scientific and evaluative environmental discourse Emphasizing cooperation and adaptation through social learning Norton provides a practical framework that encourages an experimental approach to language clarification and problem formulation as well as an interdisciplinary approach to creating solutions By moving beyond the scientific arena to acknowledge the importance of public discourse Sustainability offers an entirely novel approach to environmentalism

### **Sustainable Values, Sustainable Change** Bryan G. Norton, 2015-12-16

Systematically investigates the philosophical foundations of sustainable development in the context of the history of environmental policy Compelling Choice Sustainability is a nearly ubiquitous concept today but can we ever imagine what it would be like for humans to live sustainably on earth One of the most trafficked terms in the press on university campuses and in the corridors of government sustainability has risen to prominence as a buzzword before the many parties laying claim to it have agreed on how to define it But the term's political currency urgently demands that we develop an understanding of this elusive concept While economists philosophers and ecologists argue about what in nature is valuable and why in Sustainable Values Sustainable Change Bryan Norton offers an action oriented pragmatic response to the disconnect

between public and academic discourse around sustainability Looking to the arenas in which decisions are made and the problems driving these decisions Norton reveals that the path to sustainability cannot be guided by fixed objectives sustainability will instead be achieved through experimentation incremental learning and adaptive management Drawing inspiration from Aldo Leopold s famed metaphor of thinking like a mountain for a spatially explicit pluralistic approach to evaluating environmental change Norton outlines a new decision making process guided by deliberation and negotiation across science and philosophy Looking across scales to today s global problems Norton urges us to learn to think like a planet An excellent distillation of Norton s extensive and groundbreaking work Ben Minteer Arizona State University author of Refounding Environmental Ethics Engaging and important Sahotra Sarkar University of Texas at Austin author of Environmental Philosophy From Theory to Practice

**Environmental Ethics** Marion Hourdequin,2024-01-25

**Ecologies of Grace** Willis

Jenkins,2008-02-04 Christianity struggles to show how living on Earth matters for living with God While people of faith increasingly seek practical ways to respond to the environmental crisis theology has had difficulty contextualizing the crisis and interpreting the responses In Ecologies of Grace Willis Jenkins presents a field shaping introduction to Christian environmental ethics that offers resources for renewing theology Observing how religious environmental practices often draw on concepts of grace Jenkins maps the way Christian environmental strategies draw from traditions of salvation as they engage the problems of environmental ethics By being particularly sensitive to the ways in which environmental problems are made intelligible to Christian moral experience Jenkins guides his readers toward a fuller understanding of Christianity and ecology He not only makes sense of the variety of Christian environmental ethics but by showing how environmental

issues come to the heart of Christian experience prepares fertile ground for theological renewal [The Landscape of Reform](#) Ben A. Minteer,2006 In The Landscape of Reform Ben Minteer offers a fresh and provocative reading of the intellectual foundations of American environmentalism focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century Liberty Hyde Bailey a forgotten figure in the Progressive conservation movement urban and regional planning theorist Lewis Mumford Benton MacKaye the forester and conservationist who proposed the Appalachian Trail in the 1920s and Aldo Leopold author of the environmentalist classic A Sand County Almanac Minteer argues that these writers blazed a significant third way in environmental ethics and practice a more pragmatic approach that offers a counterpoint to the anthropocentrism versus ecocentrism use versus preservation narrative that has long dominated discussions of the development of American environmental thought Minteer shows that the environmentalism of Bailey Mumford MacKaye and Leopold was also part of a larger moral and political program one that included efforts to revitalize democratic citizenship conserve regional culture and community identity and reclaim a broader understanding of the public interest that went beyond economics and materialism Their environmental thought was an attempt to critique and at the same time reform American society and political culture Minteer explores the work of these four environmental reformers and considers two present day manifestations of an environmental third way Natural Systems Agriculture an alternative to chemical and energy intensive industrial agriculture and New Urbanism an attempt to combat the negative effects of suburban sprawl By rediscovering the pragmatic roots of American environmentalism writes Minteer we can help bring about a new civic minded environmentalism today **The Fall of the Wild** Ben A. Minteer,2018-12-11

The passenger pigeon the great auk the Tasmanian tiger the memory of these vanished species haunts the fight against extinction Seeking to save other creatures from their fate in an age of accelerating biodiversity loss wildlife advocates have become captivated by a narrative of heroic conservation efforts A range of technological and policy strategies from the traditional such as regulations and refuges to the novel the scientific wizardry of genetic engineering and synthetic biology seemingly promise solutions to the extinction crisis In The Fall of the Wild Ben A Minteer calls for reflection on the ethical dilemmas of species loss and recovery in an increasingly human driven world He asks an unsettling but necessary question Might our well meaning efforts to save and restore wildlife pose a threat to the ideal of preserving a world that isn t completely under the human thumb Minteer probes the tension between our impulse to do whatever it takes and the risk of pursuing strategies that undermine our broader commitment to the preservation of wildness From collecting wildlife specimens for museums and the wilderness aspirations of zoos to visions of assisted colonization of new habitats and high tech attempts to revive long extinct species he explores the scientific and ethical concerns vexing conservation today The Fall of the Wild is a nuanced treatment of the deeper moral issues underpinning the quest to save species on the brink of extinction and an accessible intervention in debates over the principles and practice of nature conservation

*Environmental Ethics* ,2007    **Integrated Resource and Environmental Management** D. Scott Slocombe, Kevin Stuart Hanna,2007 The aim of this volume is to provide a coherent set of chapters that address major issues in resource and environmental management The book has a North American focus with significant but not exclusive Canadian Content Integration is the organizing theme of the volume Integration as a concept meaning variously integration across disciplines across agencies and across sectors has been a key theme in the policy and management rhetoric of virtually every agency in North America and abroad for more than 30 years As one of the dominant themes of the discipline integration has been addressed both as a component and as the main focus of a variety of texts for this course However there is nothing on the market at the moment that is both up to date and North American in approach    Science & Public Policy ,2006

*Searching for Sustainability* Bryan G. Norton,2003 This book examines from a multidisciplinary viewpoint the question of what we mean what we should mean by setting sustainability as a goal for environmental management The author trained as a philosopher of science and language explores ways to break down the disciplinary barriers to communication and deliberation about environment policy and to integrate science and evaluations into a more comprehensive environmental policy Choosing sustainability as the keystone concept of environmental policy the author explores what we can learn about sustainable living from the philosophy of pragmatism from ecology from economics from planning from conservation biology and from related disciplines The idea of adaptive or experimental management provides the context while insights from various disciplines are integrated into a comprehensive philosophy of environmental management The book will appeal to students and professionals in the fields of environmental policy and ethics conservation biology and philosophy of science
