## **Sustainability Of Ngos And Globalisation:**

**Sustainability of NGOs and Globalisation** N. Ravichandran,2007 In the era of globalisation successful implementation of development programmes requires an appropriate policy framework formulation of suitable plan and schemes and an effective delivery machinery Indeed development is a process of mutual endeavour that calls for the involvement of people in all the segments of society This has necessitated the emergence of institutions which can function as a catalyst between the state and the civil society while still remaining independent of direct government intervention Conversely past experiences of NGOs suggest that availability of funds by itself is no panacea for the problems of poverty backwardness and low human development anywhere in the world This has provoked a series of questions related to the behaviour of NGOs and their dynamics a phenomenon largely missing during the last two decades That is the most profound question is concerned with the very contribution of NGOs the level and degree of implementation and identified alternative development and their level of sustainability Thus no aspect of the development discourse can be carried forward today without paying attention to the work and the voice of NGOs What is needed is not the creation of a completely new sustainability outlook but the establishment of a firm contemporary agenda that builds on some of the proven strengths of the community based agenda Within this context the thinking about sustainability in particular ought to be built on a firmer and more strategically robust foundation than available now This book comprehensively reviews the key questions about aid and sustainability including the changing motives for and the purposes of providing aid the need for new aid targets distinctions among various recipient NPOs and the implications of globalisation In fact it is an attempt to understand the term sustainability in the context of globalisation through a process of transforming that understanding into organizational action Although sustainability globalisation and organizational action can stand by themselves it may be a useful exercise to explore the sustainability concept under the globalisation setting drawing on its own experiences and best practices from India

**Environmental NGOs in World Politics** Matthias Finger,Thomas Princen,2013-01-11 At a time when states are reactive at best to the global ecological crisis and when economic globalization seems to be significantly contributing to the acceleration of that crisis environmental non governmental orgainisations NGOs are proliferating This book explains the key role of NGOs in an emerging world environmental politics showing how NGOs act both as independent bargainers and as agents of social learning to link biophysical conditions to the political realm at both the local and global levels Through the use of case studies the authors reveal the richness and diversity of NGO activity and the dificulty of the choices facing decision makers in their attempts to protect the environment seek new forms of governance and foster social environmental learning The book generates questions that are central not only to an understanding of NGO relations but to the study of international environmental politics Environmental NOGs in World Politics will be of great interest to upper level student sand scholars of both environmental politics and international relations It will also appeal to environmental policy professionals

**Handbook of Globalisation and Environmental Policy** Frank Wijen, B. C. J. Zoeteman, Jan Pieters, 2005-01-01 State of the art examination of the critical effects of globalisation on environmental governance     **International Environmental Law** Ulrich Beyerlin, Thilo Marauhn, 2011-08-11 International Environmental Law is a new textbook written for students practitioners and anyone interested in the subject The overall aim of the book is to provide a fresh understanding of international environmental law as a whole seen in the light of climate change biodiversity loss and the other serious environmental challenges facing the world The book has also been kept deliberately manageable in size by careful selection of topics and by adopting a cross cutting synthesis of regulatory interaction in the field This enables the reader to place international environmental law in the broader context of public international law in general revealing at the same time that international environmental law is experimental ground for developing new legal approaches towards global governance To this end the authors have combined theory and practice Apart from discussing concepts rule making and compliance the book looks at options for improved coordination harmonisation and even integration of existing multilateral environmental agreements analysing how conflicts between various environmental regimes can be avoided or at least adequately managed The authors argue that an appropriate management of international environmental relations must address the North South divide which continues to be a major obstacle to global environmental cooperation Furthermore the authors emphasise the growing human rights dimension of international environmental law This book is an ideal door opener for the further study of international environmental law Focusing on international environmental governance in a comprehensive way it serves to explain that each institution each actor and each instrument is part of a multi dimensional process in international environmental law and relations     Routledge Handbook of International Environmental Law Shawkat Alam, 2013 This handbook is an advanced level reference guide which provides a comprehensive and contemporary overview of the corpus of international environmental law IEL

**The Virtuous Spiral** Alan Fowler, 2013-11-05 The Virtuous Spiral is without doubt a most welcome addition to the body of knowledge that will continue to be highly valued in the NGO sector Ezra Limiri Mbogori Director Mwelekeo wa NGO MWENGO Harare Fowler demonstrates how development NGOs can engage in a virtuous spiral of performance based learning that regenerates public trust This is a timely book dealing squarely with the confidence crisis faced by many NGOs in the South and North Louk De La Rive Box Director European Centre for Development Policy Management Maastricht Sustainability is crucial for all institutions involved in international development This work offers practical guidance on how to achieve it There are three main kinds of sustainability and a section of the book is devoted to each making the impact of the organization's work sustainable ensuring continuity of funding and making the organization itself sustainable to remain viable Achieving all three creates a virtuous spiral The book takes an organizational rather than a technical or impact based approach to sustainability It is based on extensive international research and offers many practical examples of sustainability and the difficult trade offs involved     *Globalisation and the*

*Environment* Chris Chung,1998 Globalisation is changing the context of environmental management at national regional and global levels and is creating new challenges to and opportunities for the public and private sectors in the transition to sustainable development This volume presents papers on these subjects NGOs in International Politics Shamima Ahmed,David M. Potter,2006 Non governmental organizations have gained a great deal of popularity in recent years The awarding of the Nobel Prize to The International Campaign to Ban Landmines in 1997 and to Medicins Sans Frontieres in 1999 has highlighted the emergence of these organizations as new forces in international politics Yet there is no work to date that has provided an overview of the varieties of interaction between NGOs and states international organizations and in international politics This is especially true of books aimed at undergraduates NGOs in International Politics surveys a range of NGO activities and relationships in a manner accessible to students in the classroom Despite the gap in the textbook literature non governmental organizations are being taught in undergraduate courses either in theoretical terms or as components of service learning This book is designed to remedy the gap between interest in NGOs and accessible literature for use in the classroom Transparency and Consultation on Trade and Environment in Five International Organizations,2000 **The Role of Environmental NGOs in Cleaner Industrial Production** Greenpeace International,1995
