**Sustainability in Fashion and Textiles** Miguel Angel Gardetti,Ana Laura Torres,2017-09-08 There is no doubt that the textile industry the production of clothing fabrics thread fibre and related products plays a significant part in the global economy It also frequently operates with disregard to its environmental and social impacts The textile industry uses large quantities of water and outputs large quantities of waste As for social aspects many unskilled jobs have disappeared in regions that rely heavily on these industries Another serious and still unresolved problem is the flexibility textile industry companies claim to need Faced with fierce international competition they are increasingly unable to offer job security This is without even considering the informal sector work proliferating both in developing and developed countries Child labour persists within this sector despite growing pressure to halt it Fashion demands continuous consumption In seeking to own the latest trends consumers quickly come to regard their existing garments as inferior if not useless Old items become unwanted as quickly as new ones come into demand This tendency towards disposability results in the increased use of resources and thus the accelerated accumulation of waste It is obvious to many that current fashion industry practices are in direct competition with sustainability objectives yet this is frequently overlooked as a pressing concern It is however becoming apparent that there are social and ecological consequences to the current operation of the fashion industry sustainability in the sector has been gaining attention in recent years from those who believe that it should be held accountable for the pressure it places on the individual as well as its contribution to increases in consumption and waste disposal This book takes a wide screen approach to the topic covering among other issues sustainability and business management in textile and fashion companies value chain management use of materials sustainable production processes fashion needs and consumption disposal and innovation and design The book will be essential reading for researchers and practitioners in the global fashion business **Sustainable Fashion and Textiles in Latin America** Miguel Ángel Gardetti,Rosa Patricia Larios-Francia,2021-07-29 This book highlights the sustainable aspects

gases in the environment fast depleting natural resources and the increasing level of industrial effluents have made every single manufacturing activity come under the scrutiny of sustainability When all kinds of waste such as clothes furniture carpets televisions shoes paper food wastes etc end up in the landfill only a few of them are naturally decomposed and thus a large majority remains as non biodegradable It is for this reason efforts are concentrated to reduce the burden on earth by this waste and as far as used textile products are concerned there are now attempts to recycle or up cycle This book

addresses the role of sustainability by using textile waste in fashion and textiles with respect to manufacturing materials as well as the economic and business challenges and opportunities it poses This wide ranging book comprises 19 chapters on the various topics including Solutions for sustainable fashion and textile industry Agro and bio waste in the fashion industry Innovating fashion brands by using textile waste Waste in handloom textiles Business paradigm shifting 21st century fashion from recycling and upcycling Utilization of natural waste for sustainable textile coloration Circular economy in fashion and textile from waste Future pathways of waste utilization for fashion Sustainable encapsulation of natural dyes from Plant waste for textiles Agro waste applications for bio remediation of textile effluent

**Sundressed** Lucianne Tonti,2023-01-19 For conscious consumers buying clothes has never been more complicated Even as fashion brands tout their sustainability the industry is plagued by pollution waste and poor working conditions If our clothes reflect our values is it possible to be truly well dressed Sustainable fashion consultant Lucianne Tonti answers with a resounding yes Beautiful clothes made from natural fabrics including cotton wool flax and cashmere can support rural

communities and regenerate landscapes They can also reduce waste but only if we invest in garments that stand the test of time rather than chasing fast fashion trends In Sundressed Tonti travels the world to showcase producers who are reforming the industry from Mongolian goatherders to Mulberry groves in China and American hemp farms Many of these innovations begin in the fields with the cotton crops that will ultimately be spun into a soft T shirt or the sheep's wool that will be knitted into a cozy sweater Fiber farmers are taking a page from the regenerative agriculture movement giving back to the land as they tend it Meanwhile further down the supply chain top designers are working with Indigenous communities to relearn the artistry of sewing and reward them financially And global brands including Levi's are working to produce a pair of jeans that can withstand dozens of washes without any sign of wear Tonti also shows readers how accessible sustainable fashion can be Not everyone can afford a designer shirt that was lovingly hand sewn But most of us can buy less choose natural fabrics over polyester thrift shop and wear our clothes longer Sundressed is an exploration of a revolution taking place in fashion And it is a love letter to clothing that embodies beauty and value from farm to closet
