# Sustaining The Worlds Wetlands Setting Policy And Resolving Conflicts

**Maano Ramutsindela, Giorgio  
Miescher, Melanie Boehi**

## **Sustaining The Worlds Wetlands Setting Policy And Resolving Conflicts:**

Sustaining the World's Wetlands Richard Smardon,2009-06-13 Wetlands throughout the world including those described in this book are among the most sensitive and vulnerable ecosystems They are critical habitats to the world's migratory birds and a broad range of endangered mammal, reptile, amphibian and plant species They provide a broad range of flood storage, pollution control, water supply, ecotourism functions to indigenous peoples and country populations as a whole They are also at the center of severe land and water use conflicts These are conflicts between countries where wetland resources or the water supplies required for such resources involve more than one country These are conflicts in use such as conflicts between habitat protection and charcoal production in mangroves These are conflicts between groups of peoples such as indigenous peoples and hydropower advocates Many wetlands have already been destroyed by water extractions, dams, levees, channelization, and fills Others have been degraded by water pollution, overfishing, and overhunting timber harvest and a host of other activities This book describes these conflicts and international policies and institutions developed to protect and manage wetland resources Most of the broader literature and other books on wetlands focus on wildlife Wildlife is described in the case studies which follow But Richard Smardon provides us with more He traces the history of conflicts and the development of policies and institutions to protect and manage wetland resources

## **Advances in Sustainable**

**Development and Management of Environmental and Natural Resources** Rohini Prasad, Manoj Kumar Jhariya, Arnab Banerjee, 2021-12-29 Published in two volumes this new book Advances in Sustainable Development and Management of Environmental and Natural Resources Economic Outlook and Opinions addresses the varied aspect of natural resources and their management in conjunction with socioeconomic aspects With chapters from authors from around the world this volume features 24 chapters that cover many aspects of the sustainable utilization of management of natural resources and provides new insight into the nexus of ecology and economy and their application in various fields of science The chapters include case studies and research from India, Africa, South America and elsewhere After first laying the foundation the volume goes on to discuss sustainable development and natural resource management from an economics point of view Chapters address myriad issues involved in natural resources and environmental management including soil and water resources management in arid lands, resource management for agricultural purposes, contemporary global legal norms of environment and sustainable development, how emissions factor into regional economies, mitigation of the impact of climate change through sustainable practices, rainwater harvesting technology and much more The chapters include case studies that discuss soil agroforestry, agriculture, wetlands and floral diversity The book provides a solid foundation for a realistic perspective of the role of sustainable development and management of natural resources while taking the socioeconomic impact into consideration as well It will be a valuable resource and reference for the study of ecology, economics, sustainable development, natural resource management and other allied fields

Multiuse Wetlands Governance Dinesh K. Marothia, 2023-11-24 The

Ramsar Convention was established in 1971 to ensure the conservation and wise use of wetlands across the world India joined the Convention in 1982 however in the past 50 years despite Ramsar's incredible achievements the threat to wetlands across the globe including India has not diminished This book studies the governance of multiuse wetlands in India The volume provides an exhaustive analysis of rural peri urban and urban human made wetlands to establish the relevance of institutional design and the effective role of authority in governing multiuse wetland ecosystem services The author argues that the most challenging task in governing wetlands is to frame institutional choices that users and non users comprehend and agree to pursue under alternative property rights regimes Drawing on extensive fieldwork the book provides a broad look into the causes and consequences of wetland ecosystem degradation and offers insights into improved sustainable management systems for different types of multiuse wetlands It will be indispensable for students and researchers of environmental studies sustainable development biodiversity conservation and agricultural natural and environmental resource economics *The Biology of Freshwater Wetlands* Arnoud van der Valk,2012-02-09 A combination of low oxygen levels and dense plant canopies present particular challenges for organisms living in this aquatic habitat

**The Politics of Nature and Science in Southern Africa** Maano Ramutsindela, Giorgio Miescher, Melanie Boehi, 2016-09-12 This book brings together recent and ongoing empirical studies to examine two relational kinds of politics namely the politics of nature i.e. how nature conservation projects are sites on which power relations play out and the politics of the scientific study of nature These are discussed in their historical and present contexts and at specific sites on which particular human environment relations are forged or contested This spatio temporal juxtaposition is lacking in current research on political ecology while the politics of science appears marginal to critical scholarship on social nature Specifically the book examines power relations in nature related activities demonstrates conditions under which nature and science are politicised and also accounts for political interests and struggles over nature in its various forms The ecological socio political and economic dimensions of nature cannot be ignored when dealing with present day environmental issues Nature conservation regulations are concerned with the management of flora and fauna as much as with humans Various chapters in the book pay attention to the ways in which nature science and politics are interrelated and also co constitutive of each other They highlight that power relations are naturalised through science and science related institutions and projects such as museums botanical gardens wetlands parks and nature reserves

**Revitalizing Urban Waterway Communities** Richard Smardon, Sharon Moran, April Karen Baptiste, 2018-06-14 The revitalizing and restoration of rivers creeks and streams is a major focus of urban conservation activity throughout North America and Europe This book presents models and examples for organizing multiple stakeholders for purposes of waterway revitalization if not restoration within a context of fairness and environmental justice After decades of neglect and misuse the challenge of cleaning up urban rivers and streams is shown to be complex and truly daunting Urban river cleanup typically involves multiple agendas and stakeholders as well as

complicated technical issues It is also often the situation that the most affected have the least voice in what happens The authors present social process models for maximum inclusion of various stakeholders in decision making for urban waterway regeneration A range of examples is presented drawn principally from North America and Europe *Basic and Clinical Environmental Approaches in Landscape Planning* Hiroyuki Shimizu,Akito Murayama,2014-01-30 Our societies need to solve difficult issues to attain sustainability The main challenges include among others global warming demographic change an energy crisis and loss of biodiversity In tackling these issues a holistic understanding of our living space is important The field of landscape planning and design is at the core the holistic concept and it makes several contributions to achieving sustainability First landscape planning and design connects different spatial scales from site to region to the planet Second it focuses on close interrelationships between human activities and nature Third it is concerned with people's values toward their surroundings This book is based on the presentations made by German and Japanese scholars at the international symposium New Trends of Landscape Design Seamless Connection of Landscape Planning and Design from Regional to Site Scales The Cultural Context held on November 5 2012 at the Graduate School of Environmental Studies Nagoya University

**Green Politics** Dustin Mulvaney,2010-05-04 A hallmark of the past 100 years has been the greening of political thought and practice Today there are green political parties green organizations and green consumer goods all of which show how our decisions to organize donate and consume have been infused with green politics which in many ways is all about values Green politics has grown in the popular imagination as well Every day there are headlines about climate change impacts of resource extraction or chemical pollution in poor neighborhoods Underlying all of these stories are classic political questions about power representation and ultimate values Green Politics An A to Z Guide covers the availability and distribution of such resources as energy and how they impact economic development domestic politics and international cooperation and conflict Other issues of equal importance to be covered include watershed resources what happens when countries share a river and one country siphons off or pollutes waters before they reach other countries other natural resources for instance industrialized countries attempting to dictate to developing countries about rainforest resources whaling countries versus those seeking total bans on whaling as an industry air pollution global health and epidemiology e g constraining the spread of potential pandemics radioactive fall out across countries from nuclear accidents like Chernobyl From A to Z the politics of these and similar green issues are thoroughly explored via 150 signed entries Vivid photographs searchable hyperlinks numerous cross references an extensive resource guide and a clear accessible writing style make the Green Society volumes ideal for classroom use as well as for research **The Renewable Energy Landscape** Dean Apostol,James Palmer,Martin Pasqualetti,Richard Smardon,Robert Sullivan,2016-08-19 Winner of the 2017 EDRA Great Places Award Research Category Winner of the 2017 VT ASLA Chapter Award of Excellence Communications Category The Renewable Energy Landscape is a definitive guide to understanding assessing avoiding and minimizing scenic impacts as we transition to a more renewable

energy future It focuses attention for the first time on the unique challenges solar wind and geothermal energy will create for landscape protection planning design and management Topics addressed include Policies aimed at managing scenic impacts from renewable energy development and their social acceptance within North America Europe and Australia Visual characteristics of energy facilities including the design and planning techniques for avoiding or mitigating impacts or improving visual fit Methods of assessing visual impacts of energy projects and the best practices for creating and using visual simulations Policy recommendations for political and regulatory bodies A comprehensive and practical book The Renewable Energy Landscape is an essential resource for those engaged in planning designing or regulating the impacts of these new critical energy sources as well as a resource for communities that may be facing the prospect of development in their local landscape    **Wetland Faunal Diversity of West Bengal** N.
