## **Sustaining Forests A Development Strategy:**

**Sustaining Forests** World Bank, 2004-05-01 The World Bank's Forests Strategy adopted in October 2002 charts a path for the Bank's proactive engagement in the sector to help attain the goal of poverty reduction without jeopardizing the environmental values intrinsic to sustainability This strategy replaces the Bank's 1991 Forestry Strategy and was developed on the basis of the findings of an independent review of the 1991 strategy and a two year consultative process with development partners and stakeholders around the world The revised strategy Sustaining Forests is built on three guiding pillars harnessing the potential of forests to reduce poverty integrating forests into sustainable economic development and protecting global forest values Recognizing the key role forests play in contributing to the livelihoods of people living in extreme poverty government and local ownership of forest policies and interventions are emphasized along with the development of appropriate institutions to ensure good governance and the mainstreaming of forests into national development planning The strategy also aims to support ecologically socially and economically sound management of production forests by ensuring good management practices through application of safeguard procedures and independent monitoring and certification Implementation of the strategy will center on building and strengthening partnerships with the private sector non governmental organizations and other donor agencies to promote better forest conservation and management at country and global levels **Sustaining Forests** ,2004 **Sustaining Indonesia's Forests** ,2006

**Institutional setting for nature-based solutions and REDD+ policies and projects in Viet Nam** Pham, T.T.,Vu, T.P.,Nguyen, T.M.L.,Hoang, T.L.,Trần Ngọc, M.H.,2022-07-30 **Forest Strategy** Michael Gane,2007-06-28 In the past lack of understanding at the nexus between the forest sector on the one hand and strategic management on the other has led to failures in many countries to realise the potential that forest sector development offers This important new book adopts a more holistic approach to propose a new theoretical framework for this once traditional sector one which reconciles current thinking in strategic management with natural resource management The book will provide a valuable resource for both forestry professionals particularly those in managerial positions in government departments and forest services throughout the world and for advanced students and researchers exploring the issues around forest sector administration The latter will include researchers from a range of backgrounds including forestry ecology geography conservation rural development economics forest or environmental policy social studies and public affairs and will be of particular interest to groups adopting an interdisciplinary approach to forestry issues **Vietnam Forestry Development Strategy** Trieu, V.H.,Pham, T.T.,Đào Thị, L.C.,2020-12-18 The Vietnam Forestry Development Strategy VFDS is one of the country's most important plans for the forestry sector The strategic directions objectives and solutions within it differ from time to time depending on the political goals and perspectives of the moment as well as the role that the forestry sector plays in Vietnam's overall socio economic development Regardless of such changes inheriting lessons learned developing the next strategy off the back of the

experience gained from solving previous challenges and taking advantage of opportunities are always the top priorities of the Government of Vietnam. This report is the result of a collaboration between the Center for International Forestry Research (CIFOR) and the Vietnam Administration of Forestry (VNFORD). It is intended to provide VNFORD with input as they develop the new strategy. Based on secondary document research and stakeholder interviews, the report reviews achievements and challenges in the implementation of VFDS 2006-2020 as well as provides recommendations for policy makers to consider in the process of developing the new strategy. Research results show that by 2020 Vietnam had exceeded a number of the goals set out in VFDS 2006-2020 including i) accelerating the growth of production value in the sector ii) increasing the export value of wood and forest products iii) increasing domestic wood production and iv) planting protection forest (PTF) and special use forests (SUF). However, the forestry sector still faces many challenges when it comes to other key performance indicators such as i) increasing the area of production forests (PDF) with certification of sustainable forest management (SFM) ii) increasing large diameter timber production iii) increasing revenue for forest environmental services (FES) iv) securing forest and forest land for the purposes of allocation and leases v) reducing the number of poor households in forestry areas and vi) increasing the rate at which forestry workers are trained. Although some anticipated targets were not achieved, others were exceeded, for example forest cover, reforestation after logging, reduction of forest protection violations and scattered tree planting. That these goals were achieved or exceeded is the result of strong political commitment, policies trend matching the market improvements in central and local management capacity, the active support of international donors and the involvement of civil society and the private sector. That some targets were not achieved is due to the challenges of implementing policy effectively, efficiently and equitably at grassroots level, lack of resources and funding and some ambitious goals and targets not being realistic in the current economic, political and market contexts. Addressing these challenges requires a new approach and more effective economic, social and technical solutions.

Development of VFDS 2021-2030 and the 2050 vision needs to consider the implementation achievements and challenges of the previous policy as well as how to align with global trends and balance these with the current political, economic and social development context in Vietnam. The direction of the new strategy must also be considered in the context of international requirements to facilitate the mobilization of domestic and foreign financial resources to help modernize the industry as well as enhance the forestry sector's role and value in terms of poverty reduction, sustainable economic development and ensuring sustainable forest ecosystems.
