Valuing News Terry Flew, Agata Stepnik, Timothy Koskie, 2026-01-01 This edited volume examines news as both a commodity and a public good within the ongoing crisis of news media business models and the ways forward for supporting journalism in an age of digital platform dominance. It explores how Australia has distinctly approached this contemporary environment but extends this view to take in perspectives and approaches from around the world. Contributors address questions around the future of journalism existing and emerging factors impacting the commercial sustainability of the news media economy and the changing role of governments worldwide in financing news production. *Valuing News: Digital Platforms and Journalism Futures* draws insights from interviews with key stakeholders in the news media economy in depth analysis of government policies and interventions in diverse countries as well as the impact of AI on the future of journalism. This volume is a valuable resource for journalism media economy media sociology and policy scholars and students seeking to engage with policymakers on the future of sustainable news production.

[The Model Context Protocol: Unifying AI Communication](#) Etienne Noumen, The Model Context Protocol Unifying AI Communication This episode introduces the Model Context Protocol MCP an open standard designed to enable seamless communication between AI agents and external data sources or tools much like a universal adaptor. It addresses the N:M integration problem where connecting numerous AI models to various tools creates an unsustainable development burden. The show explains MCP's three tier architecture consisting of a Host the user facing application an MCP Client which manages sessions and an MCP Server which translates requests for data sources like databases or APIs. Furthermore it details how MCP uses JSON RPC 2.0 for messaging and supports dynamic discovery of capabilities alongside critical security principles for implementation. Finally it distinguishes MCP from other standards highlighting its complementary role with the Agent to Agent A2A Protocol for multi agent collaboration.

Reader Bot Naomi S. Baron, 2026-01-20 What happens to human reading when AI bots can do it for us. Explosive developments in artificial intelligence have awed everyday users with the technology's ability to draw do computer coding and especially to write Those AI generated essays and poems legal briefs and responses to requests for information are all visible evidence of large language models at work. What we don't see is the critical prior step before it can write AI needs to read. While AI's written outcomes are remarkably similar to what a diligent student lawyer or researcher might produce AI doesn't read the way that humans do. Now that AI is proving an adept reader what happens to our own reading skills and motivations especially at a time when both voluntary and school reading are increasingly on the decline. We have learned that when we let chatbots write for us there are pros and cons to handing over our virtual pens. It's critical that we

also think through the consequences of relinquishing reading a deeply human activity to bots What do we stand to gain and lose when we let AI read for us Tracing the intersecting trajectories of AI and reading Reader Bot tackles this vital question revealing why we must be thoughtful about how we welcome AI as reader into our lives , **Governing Pandora**

Andrea Bonime-Blanc,2026-02-02 A road map for developing responsible and innovative governance systems based on generative AI and other exponential technologies As exponential technology rapidly advances leaders in every sector are faced with the challenge of harnessing its potential power while developing precautionary safeguards against its risks From generative artificial intelligence to the future of quantum computing these innovations are transforming the world at an unprecedented rate leaving decision makers unsure of how to maintain control and ensure responsible development

Governing Pandora focuses on multiple exponential technologies in order to demonstrate how leaders can develop responsible and innovative governance systems This book equips leaders with frameworks and tools including a detailed five element exponential governance mind set to develop a more holistic tech governance approach for current and future waves of exponential tech Andrea Bonime Blanc encourages the development of a culture of collaboration across borders sectors and disciplines as technology takes on a bigger role in our ecosystem She explains the context risks and opportunities of the ongoing exponential technology revolution so that leaders can futureproof themselves their organizations and key stakeholders with strategies and tactics to act responsibly ethically and successfully This book speaks directly to executives board members policymakers and organizational leaders who are tasked with charting a course through the advancement of modern technologies Governing Pandora bridges the gap between exploring pure technology and managing and governing applied technology Readers will learn not only how to develop a governance mind set for exponential technology but also how to build organizational resilience

Puzzling AI Trends 2025-26 H Peter Alesso,2025-07-09 In November 2022 OpenAI quietly released ChatGPT to the public Within five days it had a million users Within two months one hundred million This moment marked the beginning of the most rapid technological transformation in history one that would fundamentally reshape not just the tech industry but every aspect of how we work learn and interact with information Puzzling AI Trends traces the Large Language Model revolution through three distinct eras The Pre Cambrian Era 2022 saw AI locked within tech giants with models costing tens of millions to train The Cambrian Explosion 2023 brought ChatGPT s viral success and Meta s game changing decision to open source LLaMA democratizing AI access The Great Bifurcation 2024 2025 split the market between commoditized general intelligence and premium reasoning systems The book profiles major players reshaping AI OpenAI s relentless capability push Google s infrastructure dominance Anthropic s safety focus and Meta s disruptive open source strategy It reveals how Chinese companies like DeepSeek and the UAE s Falcon challenge Western dominance while specialized innovators find profitable niches The economic transformation is staggering In two years GPT 4 level intelligence costs dropped 90% Models costing hundreds of millions to train now run on hardware costing thousands The book analyzes true AI costs beyond API prices infrastructure expertise and operations helping organizations decide whether to build or buy capabilities A key contribution is examining the open source versus proprietary divide Through case studies and cost analyses readers learn when free models save money when APIs provide better value and how to combine both effectively Legal complexities from licensing restrictions to IP implications receive careful attention Looking ahead the book projects AI s 2025 2026 impact across major sectors Finance will see real time risk modeling and hyper personalized advisory Medicine will witness AI diagnostics outperforming specialists and compressed drug discovery timelines Engineering will adopt generative design and predictive maintenance as standards The book addresses crucial questions about measuring machine intelligence revealing how benchmark convergence at 90% performance forces new evaluation approaches Specialized reasoning models that trade speed for accuracy represent a new frontier for applications requiring deep thought over quick patterns Essential reading for technology leaders executives investors policymakers and developers seeking to understand how AI will reshape business and society Kimi K2 Explained Paul Zillman,2025-07-19 Kimi K2 Explained The Open AI Frontier Step into the engine room of one of the most advanced AI revolutions of our time Kimi K2 Explained The Open AI Frontier is your essential guide to understanding the rise architecture and ambition behind Kimi K2 the groundbreaking trillion parameter language model

from China's Moonshot AI. More than just a chatbot or coding assistant, Kimi K2 represents a seismic shift in how intelligence is built, shared, and deployed across the globe. In a world where AI is increasingly controlled by a handful of closed platforms, Kimi K2 defies the norm. It brings together elite performance, long context reasoning, agentic autonomy, and open weight transparency into one formidable model freely available to innovators, developers, and thinkers worldwide. This book explores how Kimi K2 came to be, tracing its lineage from the original long context Kimi chatbot through the multimodal advances of K1.5 to the arrival of the MoE powered open weight marvel we now know as K2. Inside, you'll discover the architecture that powers its trillion parameter brain. The unique training methods and dataset strategies behind its reasoning abilities. Benchmarks that position Kimi K2 alongside GPT-4 and Claude 3. Its strengths, limitations, and real-world use cases from intelligent agents to software engineering. How open access is reshaping the future of global AI innovation. But this is not just a technical manual. It's a story of bold ideas, cultural shifts, and a rapidly unfolding future. It examines how a single model became a symbol of a larger movement toward openness, shared intelligence, and truly democratic AI development. Through richly detailed chapters, comparative analysis, and deep reflections on Kimi's design philosophy, this book captures a moment in history where the direction of artificial intelligence is no longer a mystery hidden behind paywalls but a frontier open to all. Whether you're an AI enthusiast, researcher, policymaker, or simply curious about what comes after ChatGPT, Kimi K2 Explained offers a front-row seat to the next chapter in machine intelligence—one where you too are part of the revolution.

[OpenAI Founding](#) Kaia Stonebrook, AI, 2025-02-22. OpenAI Founding explores Elon Musk's foundational role in the genesis of OpenAI, challenging conventional narratives by highlighting his early vision and investment as critical to the organization's establishment. The book argues that Musk's contributions extended beyond mere financial backing, significantly shaping the company's mission to develop ethical AI for the benefit of humanity. Readers will gain insights into the initial funding rounds, the recruitment of key personnel like Sam Altman and Ilya Sutskever, and the establishment of OpenAI's open source research agenda, appreciating how Musk's early influence helped lay the groundwork for advancements in artificial intelligence. The book traces the historical development of AI from its conceptual beginnings to the resurgence of neural networks, providing accessible explanations of complex concepts like machine learning and deep learning. It details Musk's growing concerns about the potential risks of unchecked AI development and his conviction that AI should benefit humanity. Later chapters address the divergence between Musk's vision and OpenAI's direction, culminating in his departure, while the conclusion examines the lasting impact of his involvement and the broader implications for the AI field, focusing on ethical considerations and the importance of open source research. Drawing on interviews and public documents, OpenAI Founding presents a narrative non-fiction account of OpenAI's formative years, suitable for readers interested in technology, business, and the future of AI. The book offers a unique perspective by connecting OpenAI's story to broader themes in economics, political science, and ethics, examining the economic implications of AI development, the political dimensions of AI governance,

and the ethical challenges posed by increasingly autonomous systems

MCP AI Agents, 2nd Edition Dr Maxwell Brooks,2025-05-28 Are you tired of building chatbots that hallucinate can t connect to external tools or don t scale in real workflows MCP AI Agents 2nd

Edition is the hands on code first guide you've been looking for. Now fully updated for 2025, it teaches AI developers how to build Claude AI agents and OpenAI driven assistants that truly understand context and act on real world data. You'll learn to harness the open Model Context Protocol (MCP) a JSON RPC 2.0 integration layer to give your agents tools, memory and connectivity beyond basic chat. This second edition delivers production grade AI infrastructure step by step projects and cutting edge techniques to create robust context aware AI systems from scratch. What You'll Learn: MCP Fundamentals, JSON RPC 2.0, Master the Model Context Protocol (MCP) and why it's a game changer for tool enhanced AI, over 1 000 community built MCP connectors for Slack, GitHub, databases, etc., exist as of 2025. Learn how to build MCP JSON RPC servers and securely expose files, APIs, databases, and more to your agents. Claude API Integration, OpenAI Tools, Step by step guidance to integrate Claude's API and OpenAI's latest function calling capabilities into your agents. Work through examples of Claude API integration and GPT 4 tool use so your AI can search documents, call web services, and execute code seamlessly. Agent Frameworks with Claude, OpenAI Explore, leading agent orchestration frameworks and techniques. You'll connect agent frameworks with Claude, OpenAI models using LangChain and open source adapters, and compare approaches like OpenAI's functions vs Anthropic's Claude for building flexible agents. Multi Step Workflows and Tools Design, tool enhanced workflows that chain LLM reasoning with multi step tool usage. Build agents that read PDFs, query SQL databases, scrape the web and summarize content with citations, then output results to reports or emails. Each project is broken down into clear step by step tasks for easy follow along. LangGraph and CrewAI Orchestration, Orchestrate complex tasks with multi agent systems. Learn to coordinate LangGraph agents, DAG based flows, and CrewAI role based teams leveraging MCP to share context and tools. The book demonstrates how frameworks like LangGraph and CrewAI can be supercharged with MCP for scalable collaborative agents. Deployment Infrastructure, Get practical advice on deploying production grade AI infrastructure. Containerize your agents with Docker and integrate into CI/CD pipelines. Deploy on cloud platforms, Railway, Render, AWS with authentication and monitoring, ensuring your AI agents are secure and ready for real world agent deployments. New in the 2nd Edition: Latest APIs, Models, Updated examples featuring Claude's newest capabilities and OpenAI's evolving API, GPT 4, GPT 3.5 Turbo, updates, function calling, etc., so you're working with state of the art tools. n8n Workflow Integration, A brand new chapter on using n8n no code automation as an MCP host, learn to plug your AI agents into enterprise workflows and automation pipelines with ease. Expanded Multi Agent Coverage, In depth guidance on building distributed agent systems with new content on LangGraph orchestration and CrewAI enhancements. Discover how the 2nd edition future proofs your skills for the era of collaborative context sharing AI agents. More Real World Projects, Additional hands on projects and case studies including new examples of agents in business intelligence, DevOps assistance, and personal productivity, all with complete tool enhanced workflows and code provided.

Sam Altman, Alicia R Alger, 2025-06-04

Sam Altman is a visionary entrepreneur and one of the most influential figures in the tech industry today. Born in

1985 in Chicago Illinois Altman's journey toward becoming a prominent leader in artificial intelligence AI and technology began in his formative years. Growing up in St Louis Missouri Altman was deeply inspired by intellectual pursuits with a particular interest in technology and programming. This curiosity led him to Stanford University where he studied computer science before dropping out to pursue his entrepreneurial ambitions. A decision that would ultimately change the course of his career. Altman's first major venture was Loopt a location based social networking company he co founded in 2005. The idea behind Loopt was innovative for its time allowing people to share their real time locations with others and though the app didn't achieve massive success it was acquired by Green Dot Corporation in 2012. This acquisition provided Altman with the financial backing to pursue even bigger opportunities and allowed him to shift his focus from being a startup founder to becoming an investor. In 2014 Altman became the president of Y Combinator YC a prestigious startup accelerator that has been instrumental in the success of companies like Dropbox Airbnb and Reddit. Under Altman's leadership YC expanded its reach increased funding and became a key force in shaping the future of Silicon Valley. He was not only an investor but also a mentor to a new generation of entrepreneurs pushing them to think big and innovate boldly. His impact at YC cemented his status as a thought leader in the tech community. However it was his role as the CEO of OpenAI that truly defined Altman's place in the history of modern technology. In 2015 he co founded OpenAI with the goal of ensuring that artificial general intelligence AGI benefits all of humanity. OpenAI's mission led by Altman is to develop safe AI technologies that are transparent accessible and aligned with human values. Under Altman's leadership OpenAI has made significant advancements including the development of powerful AI models like GPT 3 which has the potential to revolutionize industries ranging from healthcare to education. Altman's legacy is one of innovation responsibility and forward thinking leadership. His career has been marked by a deep commitment to the ethical development of technology and his work continues to shape the future of artificial intelligence striving to ensure that its benefits are shared by all.
