**The Dark Social** Tojia Cinque, Alexia Maddox, Robert W. Gehl, 2023-11-07 This book explores how people interact online through anonymous communication in encrypted hidden or otherwise obscured online spaces Beyond the Dark Web itself this book examines how the concept of dark social broadens the possibilities for examining notions of darkness and sociality in the age of digitality and datafied life The authors take into account technical moral ethical and pragmatic responses to ourselves and communities seeking to belong in of the dark Scholarship on the Darknet and Dark Social Spaces tends to focus on the uses of encryption and other privacy enhancing technologies to engender resistance acts Such understandings of the dark social are naturally in tension with social and political theories which argue that for politics and acts to matter they must appear in the public light They are also in tension with popular narratives of the dark recesses of the web which are disparaged by structural powers who seek to keep their subjects knowable and locatable on the clear web The binary of dark versus light is challenged in this book The authors provocation is that practices of dark resistance motility and power are enacted by emerging data cultures This book draws together scholarship activism and creativity to push past conceptual binary positions and create new approaches to darknet and dark social studies The Dark Social Online Practices of Resistance Motility and Power will be a key resource for academics researchers and advanced students of media studies cultural studies communication studies research methods and sociology This book was originally published as a special issue of Continuum Journal of Media Cultural Studies

**Gaming Democracy** Adrienne L. Massanari, 2024-10-29 How play and gaming culture have mainstreamed far right ideology through social media platforms From Gamergate to the ongoing Big Lie the far right has gone mainstream In Gaming Democracy Adrienne Massanari tracks the flames of toxicity found in the far right and alt right movements as they increasingly take up oxygen in American and global society In this pathbreaking contribution to the fields of internet studies game studies and gender studies Massanari argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms algorithms and attention economies While populist movements are not new phenomena such as QAnon parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to

obfuscate their intentions Using the lens of play and game studies as well as the concept of metagaming Gaming Democracy is a novel contribution to our understanding of online platforms and far right political activism □*Ace the Google Machine Learning Engineer Certification* Etienne Noumen, Master Google Cloud's most advanced AI certification with this definitive 2025 study guide From TensorFlow and data pipelines to ML ops model deployment and ethical AI this book delivers the knowledge tools and confidence to help you ace the Professional Machine Learning Engineer Exam Backed by real world examples mock exams and hands on insights The ins and outs of Google's Machine Learning Engineer certification are explored in detail A comprehensive guide is provided covering the latest updates and offering tips for success Why This Certification Matters The growing demand for skilled Machine Learning Engineers Career advancement and increased earning potential The Google brand and its weight in the tech world Decoding the Certification Requirements Exam Structure The four main exam domains Machine Learning Concepts Data Analysis Model Building and Evaluation and Machine Learning Systems Design Exam format and structure Multiple choice coding and open ended questions The Google Cloud Platform GCP proficiency required Mastering the Material Essential Skills Resources Key concepts Supervised and unsupervised learning deep learning natural language processing computer vision Recommended resources Coursera Udacity Google Cloud Skills Boost and relevant online communities Practical projects Building your own portfolio to showcase your skills Strategies for Success Effective Preparation Exam Day Tips Practice practice practice Using mock exams coding exercises and real world datasets Time management Balancing learning practice and exam day strategy Stress management Techniques to stay calm and focused on exam day Full Practice Exam 2025 included Beyond the Certification Career Paths Continued Learning The book explores potential roles Machine Learning Engineer Data Scientist AI Researcher The importance of continuous learning and staying updated with advancements in the field Building your professional network and actively contributing to the ML community Download the E Book Audiobook combo at Djamgatech at <https://djamgatech.com/product/ace-the-google-machine-learning-engineer-certification-2025-update-e-book-audiobook/> You can also Download the E Book Audiobook combo at Google Play Books at <https://play.google.com/store/audiobooks/details?id=AQAAEDKqGjosM>
