Creating Business and Corporate Strategy Adyl Aliekperov, 2021-06-13

Businesses need strategies that determine the direction of functioning and further development. If a company deals with several multifaceted businesses, each of them subsequently requires their own strategy. The issue of strategy creation and realization is a key factor that must receive the closest possible attention. In order to assure victory and be thoroughly prepared for various directions and situations that may arise, companies create their own unique strategies. This book is primarily aimed at suggesting the necessary repertoire of knowledge and skills for strategy creating with the help of the TASGRAM integrated system. Thinking, Analyzing, Strategy, Goals, Risks, Actions, and Monitoring. The main outcome of TASGRAM is a combined strategic table: business strategy, corporate strategy, goals, risks, actions, and monitoring. Each element in TASGRAM has a concrete goal, and it helps users become more focused. **Creating Business and Corporate Strategy: An Integrated Strategic System** offers a new tool for company strategy creation, showcasing various cases and examples based on theory and practice. Unlike the existing tools, the suggested system of strategy creation is simpler and definite. Its main purpose is to help create and further develop the created strategy, making this book especially valuable to researchers, academics, practitioners, and students in the fields of strategy, leadership, and management.

Criminal Procedure Jefferson

L. Ingram, 2022-05-22. **Criminal Procedure: Theory and Practice**, 3rd Edition, presents a broad overview of criminal procedure as well as a detailed analysis of specific areas of the law that require specialized consideration. The third edition provides students with an updated, comprehensive text written in reader-friendly language to introduce them to the field of criminal procedure. Significant edited legal cases are integrated into each chapter, and comments, notes, and questions accompany each case. This edition features a new chapter covering searches of Internet-connected devices and electronic devices that may store personally connected data. The chapter, *The Internet of Things*, introduces search and seizure concepts related to electronics. In addition, a section at the conclusion of each chapter, *How Would You Decide*, allows readers to examine the facts of a real case that contain some of the important concepts from each chapter. The reader can compare the individual's personal resolution of the case with the way the actual court determined the issue. Using a balanced text case format, the author provides an overview of general criminal procedure as well as guidance for law enforcement actions that honor constitutional protections and comport with the rule of law. Instructor support material prepared by the author is available on our website, including lecture slides and instructor's manual with test bank, as well as online updates on new case law in the area of criminal procedure. This textbook is ideal for all criminal justice programs in both four-year and two-year schools, especially those preparing future police officers, as well as a reference for law students and attorneys.
