**The European Union** Steven P. McGiffen,2001-09-20 New edition of this acclaimed introduction to the EU and its major policy areas [Europe and the United States](#) Franz Oswald,2006-04-30 Oswald argues that European security autonomy will lead to a more balanced transatlantic partnership even though American military might will remain far superior As U S leaders indicate a willingness to disengage from their former European protectorate the Europeanization of Europe s own security needs their ability to take care of their own crises will proceed apace An understanding of this process is key to an American foreign policy that recognizes Europe as a strategic actor in its own right an indispensable ally with its own military and nonmilitary instruments of crisis management At the end of the Cold War with the collapse of the Soviet Union in 1991 and the postcommunist transformation of Central and Eastern Europe the U S led NATO alliance found itself without its erstwhile primary enemy While NATO found new purpose as guarantor of stability for an increasing membership and crisis manager in Southeast Europe the alliance s expansion also advanced its transformation from a collective defense organization into a security community While NATO was redefining itself the European Union created the institutional and political prerequisites for a European security and defense policy In his analysis of Europe s emancipation from security dependence on the United States Oswald expects the economic strength of the European bloc to translate into responsibility for regional security Yet this is not to say that the EU is emerging as the primary challenger to U S hegemony Instead Oswald argues European security autonomy will lead to a more balanced transatlantic partnership even though American military might will remain far superior As U S leaders indicate a willingness to disengage from their former European protectorate the Europeanization of Europe s own security needs their ability to take care of their own crises will

proceed apace An understanding of this process is key to an American foreign policy that recognizes Europe as a strategic actor in its own right an indispensable ally with its own military and nonmilitary instruments of crisis management
