**Oxford Handbook of International Law and Development**, 2023-11-11 Since the mid twentieth century international law  
and international development have become two of the most prominent secular languages through which aspirations about a  
better world are articulated They have shaped the both the treatment and self understanding of the developing world often  
by positing the West as a universal model against which developing states their citizens and natural environments should be  
measured and disciplined In recent years however critical scholars have investigated the deep linkages between the concept  
of development the doctrines and institutions of international law and broader projects of ordering at the international level  
They have shown how the leading models de radicalise if not derail initiatives to redefine development and pursue other  
forms of global well being Bringing together scholars from both the Global South and the Global North the contributions in  
this Handbook invite readers to consider the limits of common normative and developmentalist assumptions At the same time  
the Handbook demonstrates how disparate but still identifiable set of ideas imaginaries norms and institutional practices  
related to law development and international governance shape today s profoundly unequal material conditions threatening  
the future of human and nonhuman life on the planet The book focuses on five distinct areas existing disciplinary frameworks  
institutions and actors regional theatres of international law and development competing social and economic agendas and  
alternative futures Offering a unique overview of the field of international law and development and assembling major critical  
historical and political economic insights this Handbook is an unmissable resource for scholars of international law  
international relations development studies and global history as well as anyone interested in the past present and future of  
our world **Human Capital** Cosimo Perrotta, Salvatore Rizzello, Claudia Sunna, 2023-07-29 This book presents a new  
interpretation of the role of human capital and the state in driving economic development It places these ideas within  
broader debates within the history of economic thought to highlight how the nature of economic activity is a collective and  
coordinated process Through examining how the welfare state reversed traditional accumulation by relying on human capital

growth the importance of the state within the development process is emphasised alongside the multifaceted nature of competition Different forms of public expenditure are then evaluated to identify the most productive forms of public spending and the drivers of long term economic development This book questions the relationship between profits and rent and proposes a new kind of economic development based around human capital It will be relevant to students and researchers interested in the history of economic thought the political economy and labour economics

**Economic Development at the Community Level** Mark Miller, 2020-11-22 How do we create more economic opportunities in the low income communities of the developing world How can these communities build greater resilience against economic uncertainties natural disasters wars and the growing threats of climate change This book reviews the research literature of economic development in low income communities of the developing world from rural villages to neighborhoods in the largest cities on earth This book is unique in gathering organizing and synthesizing research on economic development at the community level across the developing world drawing from multiple disciplines publications methodologies regions and countries Part I provides an overview and context of the many challenges facing the developing world today as well as the often heated debates over what development is and how to make it happen Part II reviews the extensive research literature in major fields

of community economic development including education and human capital overcoming the curse of natural resources entrepreneurship and micro finance tourism and sustainability The audience includes undergraduate students interested in development and sustainability graduate students and other young researchers in a wide range of disciplines who are finding their own focuses and established researchers who wish to expand their agendas An expanded bibliography accompanies the book as a downloadable supplement Apostles of Development David C. Engerman, 2025-05-30 The battle against global poverty that began after World War II was a major undertaking engaging economists engineers and organizations Featuring front and centre were six remarkable economists Amartya Sen Manmohan Singh Mahbub ul Haq Jagdish Bhagwati Rehman Sobhan and Lal Jayawardena all born as colonial subjects in the British Empire and studied at Cambridge University They represented a new figure on the world scene the Third World development expert and played a crucial role in global debates about poverty and development Apostles of Development examines their different economic doctrines and the ongoing debate surrounding economic theory in poor countries compared to rich ones The lives of these apostles reveal how development did not begin with textbooks but with real world attempts to solve very specific and pressing problems Finally the book emphasizes that development was a Global South project first and foremost aiming to improve the conditions of the world's poorest countries It challenges the conventional wisdom that sees development only as a tool of rich countries to dominate or as proof of their humanitarian spirit It argues that development succeeds not when it follows ideological prescriptions but when it looks for what works The fading of grand visions shaped by ideological concerns has been one of the lasting effects of the end of the Cold War The book argues that the best way forward is determined modesty focusing on practical matters such as addressing gross inequality and insisting that development means more than just economic growth Given the salience of questions of economic inequality and the constant visibility of the promises and problems of economic development in the world today this is a timely and important read **Grassroots Development** ,2010 *Minnesota Law Review* ,2011
