**Fundamentals of Innovative Sustainable Homes Design and Construction** Avi Friedman,2023-06-26 This book offers ideas and practices on contemporary design concepts and illustrates them with plans and photographs of outstanding examples Current planning and design modes of dwellings and neighborhoods are facing challenges of philosophy and form Past approaches no longer sustain new demands and require innovative thinking The need for a new outlook is propelled by fundamental changes that touch upon environmental economic and social aspects The depletion of non renewable natural resources and climate change are a few of the environmental challenges Increasing costs of material labor land and infrastructure have posed economic challenges with affordability being paramount among them Social challenges are also drawing the attention of designers builders and homeowners Walkable communities aging in place and multigenerational living are some of the concepts considered In addition live work environments have become part of the economic reality for those who wish to work from home which has become possible through digital advances The text would be of interest to scholars working in architecture urban planning and construction

**Building Smart Home Automation Solutions with Home Assistant** Marco Carvalho,2023-09-15 A step by step guide to building cost effective and complete home automation DIY projects using tools such as Home Assistant Raspberry Pi IoT devices the Tasmota sensor ESP32 and Grafana Key Features Learn by doing using real life practical examples to build your own home automation system Create, hack and configure IoT devices through hands on projects to be used with or without Home Assistant Customize your home automation system using Home Assistant Node RED InfluxDB and Grafana Purchase of the print or Kindle book includes a

free PDF eBook Book Description Picture a home where you can adjust the lighting based on the time of day or when movement is detected. In this same home you can also detect when a door is unexpectedly opened or an alarm is triggered in response to any suspicious activity. Such automated devices form part of a smart home and the exciting part is that this book teaches you how to create and manage these devices all by yourself. This book helps you create your own ecosystem to automate your home using Home Assistant software. You'll begin by understanding the components of a home automation system and learn how to create, hack and configure them to operate seamlessly. Then you'll set up Home Assistant on a Raspberry Pi to work as a home automation server, build your own IoT sensors based on ESP32/ESP8266 and set up real-life automation use cases using hands-on examples and projects. The chapters will also guide you in using software tools such as Node-RED, InfluxDB and Grafana to manage present and use data collected from your Home Automation devices. Finally, you'll gain insights into new technologies and trends in the home automation space to help you continue with your learning journey. By the end of this book, you'll be able to build your own creative IoT-based home automation system using different hardware and software technologies. What you will learn: Understand the fundamental concepts of home automation systems. Set up a home automation system using Home Assistant and Raspberry Pi. Create and configure ESP8266-based sensors to work with Home Assistant. Hack a commercial actuator to work with Home Assistant using Tasmota. Create automations, customize and use applications with Home Assistant. Leverage IoT software tools to take your home automation to the next level. Work on hands-on projects including LED strip lights and an ESP32 five-zone temperature logger. Explore home automation FAQs, emerging technologies and trends. Who this book is for: The book is for engineers, developers, students, makers and enthusiasts who are working on or interested in working with electronics and IoT devices, embedded systems, systems integration, computer software and coding to develop their own smart home automation systems. Technicians, teachers and other professionals who want to learn home automation-related technologies will also find this book useful. Prior experience of working with Raspberry Pi creating hardware prototypes and software programming will be beneficial.

*Smart Home Automation Guide* Tatiana Dash, 2024-11-28
