Spotify Update Warranty:

Strategic Sales Management Peter Buchenau, 2023-09-29 Sales is a CEO's job or at least it should be. But many entrepreneurs and managers come from other disciplines such as legal, production or product marketing or they may have inherited the business. In most companies a sales director is responsible for the operational management of the sales department. However, sales also need to be considered strategically in terms of the business, the products or even the target market for which many entrepreneurs or sales managers unfortunately lack the time or even the knowledge. In this book experienced interim managers reveal the most important and necessary strategic methods and approaches to maintain and lead competitiveness for years to come. Readers will benefit from the first-hand insights of prominent and internationally experienced interim managers such as Ulvi Aydin, Uwe Bruggemann, Michael Eckardt, Ulrich Gierbach, Elmar Gorich, Ralf Komor, Peter Kuhle, Siegfried Lettmann, Thomas Mertens, Stephan Rohe, Rainer Simmoleit and Stefan Zeiss. Practitioners and MBA students in particular will benefit from these insights into what makes strategic sales management successful.

Advances in Longitudinal HCI Research Evangelos Karapanos, Jens Gerken, Jesper Kjeldskov, Mikael B. Skov, 2021-08-11 Longitudinal studies have traditionally been seen as too cumbersome and labor-intensive to be of much use in research on Human-Computer Interaction (HCI). However, recent trends in market legislation and the research questions we address have highlighted the importance of studying prolonged use while technology itself has made longitudinal research more accessible to researchers across different application domains. Aimed as an educational resource for graduate students and researchers in HCI, this book brings together a collection of chapters addressing theoretical and methodological considerations and presenting case studies of longitudinal HCI research. Among others, the authors discuss the theoretical underpinnings of longitudinal HCI research such as when a longitudinal study is appropriate, what research questions can be addressed and what challenges are entailed. In different longitudinal research designs, reflect on methodological challenges in longitudinal data collection and analysis such as how to maintain participant adherence and data reliability when employing the Experience Sampling Method in longitudinal settings or how to cope with data collection fatigue and data safety in applications of autoethnography and autobiographical design which may span from months to several years. Present a number of case studies covering different topics of longitudinal HCI research from slow technology to self-tracking to mid-air haptic feedback and crowdsourcing.
