Statistical Methods For Communication Science:

Statistical Methods for Communication Science Andrew F. Hayes, 2020-10-14 Statistical Methods for Communication Science is the only statistical methods volume currently available that focuses exclusively on statistics in communication research. Writing in a straightforward personal style, author Andrew F. Hayes offers this accessible and thorough introduction to statistical methods, starting with the fundamentals of measurement and moving on to discuss such key topics as sampling procedures, probability, reliability, hypothesis testing, simple correlation, and regression, and analyses of variance and covariance. Hayes takes readers through each topic with clear explanations and illustrations. He provides a multitude of examples, all set in the context of communication research, thus engaging readers directly and helping them to see the relevance and importance of statistics to the field of communication. Highlights of this text include thorough and balanced coverage of topics, integration of classical methods with modern resampling approaches to inference, consideration of practical real-world issues, numerous examples and applications, all drawn from communication research up to date, information with examples justifying use of various techniques, and downloadable resources with macros, data sets, figures, and additional materials. This unique book can be used as a stand-alone classroom text, a supplement to traditional research methods texts, or a useful reference manual. It will be invaluable to students, faculty, researchers, and practitioners in communication, and it will serve to advance the understanding and use of statistical methods throughout the discipline.

Research and Statistical Methods in Communication Sciences and Disorders David L. Maxwell, Eiki Satake, 2006

This engaging new book provides comprehensive coverage of research methods as well as a foundation in statistical analysis vital for individuals in the communication sciences and disorders field. While most speech language pathologists and audiologists pursue clinical practice rather than research careers, it is important to understand the scientific base that their clinical work is built upon. Successful evidence-based clinical practice is rooted in this understanding. **Research and Statistical Methods in Communication Sciences and Disorders** covers the principles of research design, data analysis, and presentation of findings necessary for individuals performing research as well as consumers of scientific literature. Filled with meaningful examples written in readable language and pertinent to both speech language pathology and audiology, this resource provides the essential knowledge of scientific reasoning and methods for scientific inquiry necessary to perform and understand research.

Statistical Methods for Communication Studies Stephen M. Croucher, Stephanie Kelly, Cheng Zeng, 2025-10-23 A step by step guide through various stages of data preparation and analysis, this text demonstrates descriptive and inferential statistics in communication studies. It is suitable for statistics or quantitative methods courses in communication studies programs at the advanced and graduate level.

The SAGE Sourcebook of Advanced Data Analysis Methods for Communication Research Andrew F. Hayes, Michael D. Slater, Leslie B. Snyder, 2008 A must-have volume for every communication researcher's library. The SAGE Sourcebook of Advanced Data Analysis Methods for Communication Research provides an introductory treatment of various advanced statistical methods applied to research in the field of communication. Written by authors who use these methods in their own research, each chapter gives a non-technical overview of what the method is and how it can be used to answer communication-related questions or aid the researcher dealing with difficult data problems. Students and faculty interested in diving into a new statistical topic such as latent growth modeling, multilevel modeling, propensity scoring, or time series analysis will find each chapter an excellent springboard for acquiring the background needed to jump into more advanced technical readings.

Research Methods for Communication Science James H. Watt, Sjef A. van den Berg, 1995 A textbook for communications students that integrates the basic rules of science with the research procedures that follow those rules. Suitable for undergraduates and as a first research methods text for graduate students. Annotation copyright Book News Inc, Portland, Or.
