

Calculator Notes for the TI-84 Plus

Note: Entering Lists

There are six pre-set lists in the calculator: lists L₁ through L₆. You can create other named lists if needed. You can enter 999 elements into a list if enough memory is available.

Clearing Data

If a list already has data in it, move the cursor up so that the list name is highlighted and press **CLEAR** **ENTER**.

Entering Data Directly into a List

Follow the steps below to enter data (such as 400, 455, 390, 450, 360, 320, 480, 480) into a list.

- Press **STAT** **1** (Edit...).

- Enter each number into list L₁. If you do not see list L₁, see the sections **Resetting a List** or **Recalling a List** that follow. After entering each data value, press **ENTER**. When you are finished entering the data, press **2nd** **QUIT**. If you wish to add a data value in the middle of the list, move the cursor to the place of insertion, press **2nd** **INS**, and then enter the number. To remove an entry from a list, highlight the entry and press **DEL**.

Naming a List

If you name a list, then you can save it for later use. To name a list, highlight the name of any list, for example L₁, L₂, and so on, and press **2nd** **INS**. A new list will appear to the left of the list you highlighted. Enter a name for the list, for example, YEAR. (The flashing A tells you that you are in Alpha mode, so unless you want to enter a number as part of the name, you can just enter the list name.) Press **ENTER** and you will see that the list now has a name.
