TIME Your Brain Editors of Time Magazine, Jeffrey Kluger, 2010-02-09 The greatest computer ever built is less than 7 in long and weighs less than 3 lb. It has no moving parts and makes not a sound. And yet it is the home of dreams of songs of wisdom of philosophy of love of awareness itself. The greatest computer ever built is of course the human brain. For almost as long as we've been thinking creatures we've wondered about the galaxy of experiences emotions and insights that lives within every one of us. You have your heart you have your limbs You are your brain. The editors and writers of TIME invite you to explore that wondrous place that is the seat of your being.
