Time Honored A Global View Of Architectural Conservation:

Time Honored John H. Stubbs,2009-01-14 The absence heretofore of a comparably thoroughgoing but accessible resource on a topic of such urgent public concern was a glaring lapse that makes this deeply researched lucidly written and helpfully annotated book an invaluable addition to the literature New York Review of Books Time Honored is a comprehensive survey of the practice theory and structure of architectural heritage conservation throughout the world Offering an argument for why architectural conservation is indispensable to modern life Time Honored describes its parameters and evolution in an historical context and then methodically presents approaches used in various countries showing how historic preservation in the West differs from conservation in the rest of the world Illustrated throughout with over 300 photographs drawings maps and charts No other book navigates the global conservation programs policies and project types so completely

Architectural Conservation in Europe and the Americas John H. Stubbs,Emily G.

Makaš,2011-05-04 From such well known and long vexed sites as the Athenian Acropolis to more contemporary locales like the Space Age Modernist capital city of Bras lia the conflicting and not always neatly resolvable forces that bear upon preservation are addressed as clearly and thoughtfully as the general reader could hope for New York Review of Books an astonishing feat of research compilation and synthesis Context The book delivers the first major survey concerning the conservation of cultural heritage in both Europe and the Americas Architectural Conservation in Europe and the Americas serves as a convenient resource for professionals students and anyone interested in the field Following the acclaimed Time Honored this book presents contemporary practice on a country by country and region by region basis facilitating comparative analysis of similarities and differences The book stresses solutions in architectural heritage protection and the contexts in which they were developed

Architectural Conservation in Europe and the Americas John H.

Stubbs,Emily Gunzburger Makaš,2011 The first major survey that looks at the conservation of cultural heritage in both Europe and the Americas this book will serve as a convenient resource for professionals students and anyone interested in the field Following the acclaimed Time Honored Architectural Conservation in Europe and the Americas presents contemporary practice on a country by country and region by region basis facilitating comparative analysis of similarities and differences Written to stand alone from the predecessor volume this book will be followed by a third and final volume covering Asia Africa Oceania and the Polar Regions

World Heritage and National Registers Thomas R.

Gensheimer,Celeste Lovette Guichard,2017-09-08 Historic sites celebrate defining moments in history memorialize important events and people and contribute to the character of the locations where they are situated Heritage designation both globally and nationally is an inherently contested issue As detailed in this volume concerns of politics and identity criteria for designation impacts on communities and sites and challenges to management planning are central to any understanding of the process by which heritage sites are created developed and maintained The idea for this volume originated at a

symposium hosted by the Savannah College of Art and Design Contributors address such topics as the need to revamp criteria for designation the effect historic site recognition has on local communities the challenges encountered in maintaining a site and issues linked to specific political climates or actions and group identity The contributors constitute an international cast of leading scholars employees and policy makers all of whom have had extensive experience with World Heritage and National Register site stewardship The work will be an invaluable reference for historians architects and those committed to the preservation of national monuments Architectural Conservation in Asia John H. Stubbs, Robert G.

Thomson, 2016-11-10 At a time when organized heritage protection in Asia is developing at a rapid pace Architectural Conservation in Asia provides the first comprehensive overview of architectural conservation practice from Afghanistan to the Philippines The country by country analysis adopted by the book draws out local insights experiences best practice and solutions for effective cultural heritage management that will inform study and practice both in Asia and beyond Whereas architectural conservation in much of the Western world has been extensively documented this book brings together coverage of many regions where architectural conservation has been understudied Following on from the highly influential companion volumes on global architectural conservation and architectural conservation in Europe and the Americas with this book the authors extend their pioneering global examination to the dynamic and evolving field of architectural conservation in Asia Throughout the book the authors and regional experts provide local case studies and profile topics that bring depth and insight to this ambitious study As architectural conservation becomes increasingly global in practice this book will be of considerable assistance to architectural conservation practitioners site managers and students of architecture planning archaeology and heritage studies worldwide Essential Economics for Heritage Peter G. Gould, 2025-10-16 Essential

Economics for Heritage introduces tools from economics to help students and heritage professionals who face economic issues and choices in their day to day work in archaeology museum and site management and heritage research presentation and conservation The book begins with an easy to follow primer linking heritage and economic theory Case studies and non technical explanations of theoretical issues follow along with useful analytical approaches and practical insights that will support readers as they make decisions on allocating scarce financial physical and human resources Peter G Gould critically evaluates the role of heritage in the world economy and the tools economists have created to value heritage resources He applies economic concepts and methods to real world challenges including heritage tourism the role of heritage in economic development heritage sustainability investment decision making and financing for heritage organizations He explores emerging directions in the often contentious relationships among international agencies national governments the private sector and communities in the management of heritage The book's scope is global It draws on examples from wealthy countries in the Global North and from low to middle income countries that often depend on heritage resources to fuel tourist economies Essential Economics for Heritage is an invaluable resource for heritage practitioners and can serve as a textbook

or auxiliary text for courses in archaeology heritage site or museum management conservation and other heritage fields

Values in Cities James Lesh,2022-09-23 Examining urban heritage in twentieth century Australia James Lesh reveals how evolving ideas of value and significance shaped cities and places Over decades a growing number of sites and areas were found to be valuable by communities and professionals Places perceived to have value were often conserved Places perceived to lack value became subject to modernisation redevelopment and renewal From the 1970s alongside strengthened activism and legislation with the innovative Burra Charter 1979 the values based model emerged for managing the aesthetic historic scientific and social significance of historic environments Values thus transitioned from an implicit to an overt component of urban architectural and planning conservation The field of conservation became a noted profession and discipline Conservation also had a broader role in celebrating the Australian nation and in reconciling settler colonialism for the twentieth century Integrating urban history and heritage studies this book provides the first longitudinal study of the twentieth century Australian heritage movement It advocates for innovative and reflexive modes of heritage practice responsive to urban social and environmental imperatives As the values based model continues to shape conservation worldwide this book is an essential reference for researchers students and practitioners concerned with the past and future of cities and heritage The Foreword and Chapter 1 Introduction of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license

Adaptive Reuse Liliane Wong,2024-12-16 Building in existing fabric requires more than practical solutions and stylistic skills The adaptive reuse of buildings where changes in the structure go along with new programs and functions poses the fundamental question of how the past should be included in the design for the future On the background of long years of teaching and publishing and using vivid imagery from Frankenstein to Rem Koolhaas and beyond the author provides a comprehensive introduction to architectural design for adaptive reuse projects History and theory building typology questions of materials and construction aspects of preservation urban as well as interior design are dealt with in ways that allow to approach adaptive reuse as a design practice field of its own right Fundamental introduction to an important field of architectural design For those who teach and those who learn This new expanded edition includes a comprehensive bibliography and detailed indices
