Remote Sensing to Estimate Paddy Area and Production Lea Rotairo,Asian Development Bank,2019 A substantial portion of
the world s rice is produced and consumed in the Asia and Pacific region As much of the region s population depends on rice
farming for consumption and livelihood the demand for good quality statistics remains essential for effective policy
formulation Recent advances in remote sensing serve as a viable alternative to traditional methods of compiling agricultural
statistics by responding to the emerging data requirements and overall needs of modern agriculture especially for staple
commodities such as rice This publication outlines the procedures methods and tools developed for generating statistics on
paddy rice area and production using remote sensing and GIS techniques It is intended to encourage and assist national
statistical systems in piloting and adopting satellite based techniques as an alternative to existing data collection methods
while enabling other interested readers to comprehend whether the adoption of these methodologies can improve the quality
and timeliness of agricultural statistics The handbook also serves as a complement to a massive online open course
